The Grand Titration:

The Grand Titration Joseph Needham, 2013-11-05 First published in 1969 The historical civilization of China is with the Indian and European Semitic one of the three greatest in the world yet only relatively recently has any enquiry been begun into its achievements in science and technology Between the first and fifteenth centuries the Chinese were generally far in advance of Europe and it was not until the scientific revolution of the Renaissance that Europe drew ahead Throughout those fifteen centuries and ever since the West has been profoundly affected by the discoveries and invention emanating from China and East Asia In this series of essays and lectures Joseph Needham explores the mystery of China's early lead and Europe's later overtaking

The Scientific Revolution H. Floris Cohen, 1994-10-03 In this first book length historiographical study of the Scientific Revolution H. Floris Cohen examines the body of work on the intellectual social and cultural origins of early modern science Cohen critically surveys a wide range of scholarship since the nineteenth century offering new perspectives on how the Scientific Revolution changed forever the way we understand the natural world and our place in it Cohen's discussions range from scholarly interpretations of Galileo Kepler and Newton to the question of why the Scientific Revolution took place in seventeenth century Western Europe rather than in ancient Greece China or the Islamic world Cohen contends that the emergence of early modern science was essential to the rise of the modern world in the way it fostered advances in technology A valuable entry to the literature on the Scientific Revolution this book assesses both a controversial body of scholarship and contributes to understanding how modern science came into the world

Historians Debate the Rise of the West Jonathan Daly, 2014-07-11 How and why did Europe rise to world pre eminence Providing an overview of this central historical conundrum of modern times **Historians Debate the Rise of the West** enables students to grasp major scholars evaluations of the biggest picture of all how Western civilization fits into modern world history Most historians who write in this area subscribe to a combination of interpretations set forward by scholars of the field like David Landes Jared Diamond or Kenneth Pomeranz But it is often difficult to understand the position they are coming from and for readers to understand clearly how Europe made the transition from merely one of many developing civilizations to the world's first industrial power In this volume Jonathan Daly introduces us to the main interpretations of Europe's rise that have been proposed over the past half century and presents the views of these historians and schools of scholarship advocating for each point of view and letting each author speak for him or herself through the inclusion of brief textual selections Also included are interesting biographical details for each scholar as well as a list of further reading for each chapter and a collection of maps An ideal introduction for students of world history

The Rise of Western Power Jonathan Daly, 2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world **The Rise of Western Power** charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust

imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and industrial among others The result is a clear and engaging introduction to the history of Western civilization

Science and Civilisation in China: Volume 7, The Social Background, Part 2, General Conclusions and Reflections Joseph Needham, 2004-07-22 It would be difficult to overstate the importance of Joseph Needham's Science and Civilisation in China series For nearly fifty years Needham and his collaborators have revealed the ideals concepts and achievements of China's scientific and technological traditions from the earliest times to about 1800 through this great enterprise During his long working lifetime Needham kept in draft various essays some written with collaborators in which he set out his broad views on the Chinese social and historical context These essays edited by one of his closest collaborators Kenneth Robinson are contained in the present volume A reading of this material makes it possible to reconstruct the assumptions and problematics that underpinned and drove the Needham project throughout the nearly one half century during which he was at the helm The documents gathered here reveal the intellectual foundations of one of the greatest scholarly enterprises of the twentieth century

The Return of Nature John Bellamy Foster, 2021-06-01 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's Marx's Ecology Materialism and Nature introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today's unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs

Imagined Civilizations Roger Preston Hart, 2013-08-15 While the Jesuits claimed Xu as a convert he presented the Jesuits as men from afar who had traveled from the West to China to serve the emperor

Philosophy of Technology Robert C. Scharff, Val Dusek, 2013-12-02 The new edition of this authoritative introduction to the philosophy of technology includes recent developments in the subject while retaining the range and depth of its selection of seminal

contributions and its much admired editorial commentary Remains the most comprehensive anthology on the philosophy of technology available Includes editors insightful section introductions and critical summaries for each selection Revised and updated to reflect the latest developments in the field Combines difficult to find seminal essays with a judicious selection of contemporary material Examines the relationship between technology and the understanding of the nature of science that underlies technology studies

Technology, Politics, And Society In China Rudi Volti, 2019-07-11 This study is the first to summarize the major technological policies implemented in China since 1949 and to place them in their social and historical context Dr Volti looks at technological change in China as part of a broader process of economic political cultural and organizational change focusing primarily on four key areas agriculture energy ground transportation and medicine and public health He emphasizes how technological change has been shaped by political and ideological structures notes how China's unique cultural heritage has affected adoption of technologies developed outside China and assesses China's success in developing technologies appropriate to its specific needs as an economically and politically developing nation He draws on interviews with technicians engaged in the transfer of technology to China as well as extensive primary source materials
