beyond any one person's or government's control. In fact, as Liaquat Ahamed reveals, it was the decisions made by a small number of central bankers that were the primary cause of that economic meltdown, the effects of which set the stage for World War II and reverberated for decades. As we continue to grapple with economic turmoil, *Lords of Finance* is a potent reminder of the enormous impact that the decisions of central bankers can have, their fallibility, and the terrible human consequences that can result when they are wrong.

Journalism and the American Experience Bruce J. Evensen, 2018-02-12
Journalism and the American Experience offers a comprehensive examination of the critical role journalism has played in the struggle over America's democratic institutions and culture. Journalism is central to the story of the nation's founding and has continued to influence and shape debates over public policy, American exceptionalism, and the meaning and significance of the United States in world history. Placed at the intersection of American Studies and Communications scholarship, this book provides an essential introduction to journalism's curious and conflicted coexistence with the American democratic experiment.

Lords of Finance Liaquat Ahamed, 2009
 Argues that the stock market crash of 1929 and subsequent Depression occurred as a result of poor decisions on the part of four central bankers who jointly attempted to reconstruct international finance by reinstating the gold standard.

The Day the Bubble Burst Gordon Thomas, Max Morgan-Witts, 2014-07-01
 The New York Times bestseller that tells the story of an overheated stock market and the financial disaster that led to the Great Depression of the 1930s. A riveting living history about Black Tuesday, October 29, 1929. Captures the era, the intoxicating expectancy, the hope that ruled men's heart and minds before the bubble burst, and the black despair of the decade that followed.

"The" Great Slump Goronwy Rees, 1970
An Uncommon Union John D. Hannah, 2009
 This insightful history explores the stereotype of Dallas Theological Seminary as an anti-intellectual stronghold of fundamentalism and dispensational premillennialism. The tenures of the school's five presidents reveal the tensions that DTS, a blend of differing heritages and of opposing traditions, has experienced amid changes in American religious and cultural life.

1930 Arthur Haberman, 2018-09-25
 The year 1930 can be seen as the dawn of a period of darkness, the beginning of a decade that Auden would style "low dishonesty." That year was one of the most reflective moments in modernity. After the optimism of the nineteenth century, the West had stumbled into war in 1914. It managed to survive a conflagration, but it failed in the aftermath to create something valued. In 1930, Europe was questioning itself and its own viability. Where are we heading? a number of public intellectuals asked. Who are we, and how do we build moral, social, and political structures? Can we continue to believe in the insights and healing quality of our culture? Major thinkers: Mann, Woolf, Ortega, Freud, Brecht, Nardal, and Huxley, as well as a number of artists including Picasso and Magritte, and musicians such as Weill, sought to grapple with issues that remain central to our lives today: the viability of a secular Europe with Enlightenment values coming to terms with a darker view of human nature, mass culture, and its dangers, the rise of the politics of irrationality, identity, and the other in Western civilization, new ways to represent the postwar world, the epistemological dilemma in a world of

uncertainty and the new Fascism was it a new norm or an aberration Arthur Haberman sees 1930 as a watershed year in the intellectual life of Europe and with this book the first to see the contributions of the public intellectuals of 1930 as a single entity he forces a reconsideration and reinterpretation of the period
