Ski ,1990-09 **Sports Law in Switzerland** Lucien W. Valloni,Thilo Pachmann,2018-02-28 Derived from the renowned multi volume *International Encyclopaedia of Laws* this practical analysis of sports law in Switzerland deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports

have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policymakers access to sports law at this specific level Lawyers representing parties with interests in Switzerland will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law *Ski* ,1991-12 **Ski** ,1990-10 **Snow Country** ,1993-07 In the 87 issues of Snow Country published between 1988 and 1999 the reader can find the defining coverage of mountain resorts ski technique and equipment racing cross country touring and the growing sport of snowboarding during a period of radical change The award winning magazine of mountain sports and living tracks the environmental impact of ski area development and people moving to the mountains to work and live Competition Law and Regulation in European Telecommunications Pierre Larouche,2000-05-24 Using numerous practical examples this book examines the evolution of EC telecommunications law following the achievement of liberalisation the main policy goal of the 1990s After reviewing the development of regulation in the run up to liberalisation the author identifies the methods used to direct the liberalisation process and tests their validity in the post liberalisation context A critical analysis is made of the claim that competition law will offer sufficient means to regulate the sector in the future Particular emphasis is given to the way in which EC Competition Law changed in the 1990s using the essential facilities doctrine an expansive non discrimination principle and the policing of cross subsidisation to tackle what were then thought of as regulatory matters Also examined within the work is the procedural and institutional interplay between competition law and telecommunications regulation In conclusion Larouche explores the limits of competition law and puts forward a long term case for sector specific regulation with a precise mandate to ensure that the telecommunications sector as a whole fulfils its role as a foundation for economic and social activity
