Focusing first on political psychology at the individual level, attitudes, values, decision making, ideology, personality and then moving to the collective group identity, mass mobilization, political violence, this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy. Now with new material providing an up to date account of cutting edge research within both psychology and political science, this is an essential reference for scholars and students interested in the intersection of the two fields.

Explorations in Political Psychology Shanto Iyengar, William James McGuire, 1993. Mapping the territory where political science and psychology intersect, *Explorations in Political Psychology* offers a broad overview of the field of political psychology from its historical evolution as an area of inquiry to the rich and eclectic array of theories, concepts and methods that mark it as an emerging discipline. In introductory essays, editors Shanto Iyengar and William J. McGuire identify the points of exchange between the disciplines represented and discuss the issues that make up the subfields of political psychology. Bringing together leading scholars from social psychology and political science, the following sections discuss attitude research, the study of political attitudes and opinions, cognition and information processing, the relationship between the structures of human information processing and political and policy preferences, and decision making: how people make decisions about political preferences. As a comprehensive introduction to a growing field of interdisciplinary concern, *Explorations in Political Psychology* will

particular interest to political psychologists centers around how foreign policy decisions are made. The psychological phenomena that political psychologists examine have to do with how individuals perceive, interpret, feel about, and react to their environment. The political factors have to do with the activities involved in governing or the making of public policy that is with how the material and human resources of a collectivity are allocated. The research presented in this volume addresses 6 key questions that link psychological and political processes and the chapters are organized around three conceptual clusters: perception studies, personality studies, and studies of group dynamics.

Aging and Political Leadership Angus McIntyre, 1988-09-13

The final part of this book takes an in-depth look at Ronald Reagan. His advanced age is not unusual in a political leader. Other heads of government in the post-war world have been as old as or even older than he when they held office, for example Churchill, Chiang Kai-shek, Nehru, Salazar, De Gaulle, Kenyatta, Tito, Mao Zedong, Adenauer, and Ulbricht. The large number of names gives the impression that contemporary leadership is gerontocracy. The book is divided into three sections. The first two examine middle age and old age, with each section offering numerous case studies from a variety of countries.
