Skin Im In A First Look At Racism:

The Skin I'm In Pat Thomas, 2003-03-01 There are children experiencing the pain of racism This book is here for you to help the cope with that abhorrent reality Racial discrimination is cruel and inhumane especially so to younger children This book encourages kids to accept and love what makes them different and beautiful Parents teachers and gift givers will find language that is simple direct and easier for younger children to understand a book about how to help and empower children suffering from racism a helpful book written by a psychotherapist and counselor a whole series of books for children to explore emotional issues The A First Look At series promotes positive interaction among children parents and teachers and encourage kids to ask questions and confront social and emotional questions that sometimes present problems Books feature appealing full color illustrations on every page plus a page of advice to parents and teachers

Life and Loss Linda Goldman, 2013-11-20 Many clinicians recognize that denying or ignoring grief issues in children leaves them feeling alone and that acknowledging loss is crucial part of a child s healthy development Really dealing with loss in productive ways however is sometimes easier said than done For decades Life and Loss has been the book clinicians have relied on for a full and nuanced presentation of the many issues with which grieving children grapple as well as an honest exploration of the interrelationship between unresolved grief educational success and responsible citizenry The third edition of Life and Loss brings this exploration firmly into the twenty first century and makes a convincing case that children s grief is no longer restricted only to loss identified children Children s grief is now endemic it is global Life and Loss is not just the book clinicians need to understand grief in the twenty first century it s the book they need to work with it in constructive ways

Integrative Antiracism Edith P. Samuel, 2005-01-01 From both a theoretical and practical standpoint racism is one of the most important topics that has engaged the attention of social scientists in North America in recent years As societies become more ethnically diverse people from different cultures are increasingly coming into contact with each other resulting in ever greater opportunities for racism to manifest itself In this work Edith Samuel examines the educational experiences of South Asian students and faculty members from the perspective of integrative antiracism the study of how the dynamics of social difference are mediated in people s daily lives Specifically she analyses perceptions of and responses to racism in four critical areas faculty student relationships peer group interactions curriculum and the psychosocial dimension Antiracism scholars maintain that racism is widespread on Canadian university campuses Drawing on the available literature and extensive interviews with students and faculty Samuel looks at both overt and covert forms of racism as well as structural racism that results in discrimination in admissions and employment She also looks at race class gender history and culture and how these interlocking systems produce unique experiences of racism for South Asians in academe Through the exploration of the intricate patterns of South Asians assimilation into university life Integrative Antiracism identifies the numerous barriers racial minorities encounter and suggests a variety of approaches to fostering a more equitable education

Modern Japanese share a myth to the effect that they harbor in their midst an inferior race less human than the stock that fathered their nation as a whole These pariahs numbering more than two million are segregated by caste just as firmly as the Negro is in the United States The present volume to which several Japanese and American social scientists have contributed offeres an interdisciplinary description and analysis of this strangely persistent phenomenon inherited from feudal times Its main thesis is that caste and racism are derivatives of identical psychological processes in human personality however differently structure they may be in social institutions It finds that what it terms status anxiety related to defensively held social values leads to a need to segregate disparaged parts of the population on grounds of innate inferiority Until the time of their official emancipation in 1871 the so called eta were distinguished visibly by their special garb Today few clues to their identity are visible yet they remain a distinguishable segregated segment of the population and bear inwardly in a

psychological sense the stigma resulting from generations of oppression This volume traces the story of the outcasts in complete detail their origin their stormy post emancipation history and their present leftist political significance Large populations of outcasts live in urban ghettos within the major cities of south central Japan In some of these metropolitan centers they comprise up to 5 percent of the population but contribute 60 to 65 percent of unemployment and relief roles They have periodic trouble with the police they manifest a delinquency rate more than three times that of the ordinary population their children do poorly in school they are subject to various forms of job discrimination and few marriages are successfully consummated across the caste barrier Some try to escape their past identity by becoming prostitutes or by entering the underworld Those who survive discrimination to achieve status in society either live in fear of exposure if they are passing or overtly maintain their identity in proud isolation Some who live in rural communities have achieved equal economic status with their neighbors but not full social acceptance In their theoretical closing discussion the authors offer a challenging critique of Marxian class theory in introducing the concept of expressive exploitation that is the psychological use of a subordinate group as a repository of what is disavowed by the values of a culture in a caste society as distinct in form and function from the instrumental economic or political exploitation of subjected minorities in class societies

Rethinking Evolution in the Museum Monique

Scott, 2007-11-19 *Rethinking Evolution in the Museum* explores the ways diverse natural history museum audiences imagine their evolutionary heritage. In particular, the book considers how the meanings constructed by audiences of museum exhibitions are a product of dynamic interplay between museum iconography and powerful images museum visitors bring with them to the museum. In doing so, the book illustrates how the preconceived images held by museum audiences about anthropology, Africa, and the museum itself strongly impact the human origins exhibition experience. Although museological theory has come increasingly to recognize that museum audiences make meaning in exhibitions or make their own complex interpretations of museum exhibitions, few scholars have explicitly asked how *Rethinking Evolution in the Museum* however provides a rare window into visitor perceptions at four world class museums: the Natural History Museum and Horniman Museum in London, the National Museums of Kenya in Nairobi, and the American Museum of Natural History in New York. Through rigorous and novel mixed methods (quantitative and qualitative) covering nearly 500 museum visitors, this innovative study shows that audiences of human origins exhibitions interpret evolution exhibitions through a profoundly complex convergence of personal, political, intellectual, emotional, and cultural interpretive strategies. This book also reveals that natural history museum visitors often respond to museum exhibitions similarly because they use common cultural tools picked up from globalized popular media circulating outside of the museum. One tool of particular interest is the notion that human evolution has proceeded linearly from a bestial African prehistory to a civilized European present. Despite critical growths in anthropological science, and museum displays, the outdated Victorian progress motif lingers persistently in popular media and the popular imagination. *Rethinking Evolution in the Museum* sheds light on our relationship with natural history museums and will be crucial to those people interested in understanding the connection between the visitor, the museum, and media culture outside of the museum context.
