## LETHAL DOSES OF COMMON CHEMICALS

LD<sub>50</sub> stands for 'median lethal dose', and is defined as the amount of a substance required to kill 50% of a test population of animals, expressed in mg per kg of body weight. Human LD<sub>50</sub> values are calculated from these tests. For ethical reasons, tests on animals to determine LD<sub>50</sub> are being phased out in favour of other methods.

The figures provided below are median lethal doses, and are rough averages for a body weight of 75kg, when the amount specified is taken all at once. Actual figures will vary depending on physical and medical condition.
