The Depression Dilemmas of Rural Iowa, 1929-1933 Lisa L. Ossian, 2012-01-01 To many rural Iowans the stock market crash on New York's Wall Street in October 1929 seemed an event far removed from their lives even though the effects of the crash became all too real throughout the state From 1929 to 1933 the enthusiastic faith that most Iowans had in Iowan President Herbert Hoover was transformed into bitter disappointment with the federal government As a result Iowans directly questioned their leadership at the state county and community levels with a renewed spirit to salvage family farms demonstrating the uniqueness of Iowa's rural life Beginning with an overview of the state during 1929 Lisa L Ossian describes Iowa's particular rural dilemmas evoking through anecdotes and examples the economic nutritional familial cultural industrial criminal legal and political challenges that engaged the people of the state The following chapters analyze life during the early Depression new prescriptions for children's health creative housekeeping to stretch resources the use of farm playlets to communicate new information creatively and memorably the demise of the soft coal mining industry increased violence within the landscape and the movement to end Prohibition The challenges faced in the early Great Depression years between 1929 and 1933 encouraged resourcefulness rather than passivity creativity rather than resignation and community rather than hopelessness Of particular interest is the role of women within the rural landscape as much of the increased daily work fell to farm women during this time While the women addressed this work simply as making do Ossian shows that their resourcefulness entailed complex planning essential for families emotional and

physical health Ossian's epilogue takes readers into the Iowa of today dominated by industrial agriculture and asks the reader to consider if this model that stemmed from Depression era innovation is sustainable Her rich rural history not only helps readers understand the particular forces at work that shaped the social and physical landscape of the past but also traces how these landscapes have continued in various forms for almost eighty years into this century **Unnatural**

Resources Michael Camp, 2019-09-26 *Unnatural Resources* explores the intersection of energy production and environmental regulation in Appalachia after the oil embargo of 1973 The years from 1969 to 1973 saw the passage of a number of laws meant to protect the environment from human destruction and they initially enjoyed broad public popularity However the oil embargo which caused lines and fistfights at gasoline stations refocused Americans attention on economic issues and alerted Americans to the dangers of relying on imported oil As a drive to increase domestic production of energy gained momentum it soon appeared that new environmental regulations were inhibiting this initiative A backlash against environmental regulations helped inaugurate a bipartisan era of market based thinking in American politics and discredited the idea that the federal government had a constructive role to play in addressing energy issues This study connects political labor and environmental history to contribute to a growing body of literature on the decline of the New Deal and the rise of pro market thinking in American politics *In the Kingdom of Coal* Dan Rottenberg, 2004-03 First Published in 2003
