Struggle For Development National Strategies In An International Context:

The Struggle for Development Martin Godfrey, Manfred Bienefeld, 1985 **The Struggle for Development** Manfred Bienefeld, Martin Godfrey, 1982 Third World Industrialization in the 1980s Raphie Kaplinsky, 2010-11-26 First published in 1984 this work explores the issues surrounding the industrialisation of the Third World at the beginning of the 1980s The expectation that Newly Industrialising Countries would facilitate industrial growth via an outward orientated strategy had begun to be the combination of growing recession growing protectionism and the diffusion of radical microelectronics related technical change In addition the high indebtedness of developing countries made them increasingly dependent on assistance from the IMF and IBRD whose policies increased the tendency towards de industrialisation The papers in this volume explore all of these issues and their implication for LDC industrial strategy in the 1980s **The Politics of Hunger** John W. Warnock, 2019-07-19 Originally published in 1987 This important and provocative book explains the persistence of hunger poverty and the lack of balanced development in many countries and the central role of agriculture in economic development Most theories of agricultural development are based on the experiences of western Europe and the United States while the two models for successful late development have been Japan and the Soviet Union This book surveys the evolution of agriculture under colonialism in Latin America Africa and Asia and concludes that this long period distorted the development prospects for these areas and retarded the production of food Under strong state capitalist governments a few underdeveloped countries have broken the colonial patterns of development However other post revolutionary societies are having far less success because of economic blockades and outside military intervention While the primary focus of the book is on the short run problems of inequality the author examines the long run ecological and resource constraints to a sustainable food system and raising the standard of living in the underdeveloped world Elections In Independent Africa Fred M. Hayward, 2019-08-27 The electoral process has been an integral part of the political landscape of independent Africa for more than a quarter century and has roots going back to traditional African societies An examination of the independence period demonstrates the rich diversity of forms experiences and meanings of elections in Africa For some observers elections are a clear example of multiple failures in Africa the failure of democracy and institutional transfer and the breakdown of much of the African political process in general The authors of this book argue that elections in Africa have played a much more significant role than has commonly been recognized that in spite of problems elections are an important part of African contemporary political life It has been too easy to dismiss elections in Africa as irrelevant because there are fewer today than there were two decades ago or because they have frequently failed to conform to democratic norms However in a period in which the primary trends of government are toward exclusion African elections provide one of the few instruments of political action open to civil society This study of the electoral process suggests a number of themes and conclusions about the relationship of the electoral process to state power and institutions elite competition mass participation legitimacy and its

limits ethnic conflict mobilization party competition authoritarian regimes the growing incidence of electoral violence and mass support for democratic values Fred M Hayward's substantive introduction discusses the electoral process in general Eight case studies of key African countries then illustrate the varied meanings and implications of elections in independent Africa and in the final chapter Hayward draws conclusions about the role and impact of elections It is clear that although electoral processes have demonstrated a certain fragility both the form and the process have shown remarkable resilience
