Struggle For Social Change In Southern Africa:

The Struggle for Social Change in Southern Africa Dickson A. Mungazi, 1989 This book shows the applicability of Thomas Kuhn's theory of the structure of scientific revolutions to the struggle for social change in southern Africa. The components of this theory which seem applicable to the conflict and the struggle for fundamental social change in this troubled region of Africa are definition of paradigms, their functions, the elements of paradigm shifts and their effect, the relationship between paradigm shift in natural and social science and the concept of anomaly. This study utilizes the components of this theory to discuss why the problems of southern Africa seem to defy this solution. Global Struggles and Social Change Christopher Chase-Dunn, Paul Almeida, 2020-09-22 Deftly demonstrates how the rise and fall of social movements throughout history is closely linked to economic and political developments. In the early decades of the twenty-first century, an international movement to slow the pace of climate change mushroomed across the globe. The self-proclaimed Climate Justice movement urges immediate action to reduce carbon emissions and calls for the adoption of bold new policies to address global warming before irreversible and catastrophic damage threatens the habitability of the planet. On another front, since the 1980s, multiple waves of resistance have occurred around the world against the uneven transition from state-led development to the neoliberal globalization project. Both Climate Justice and Anti-Austerity movements represent the urgency of understanding how global change affects the ability of citizens around the world to mobilize and protect themselves from planetary warming and the loss of social protections granted in earlier eras. In Global Struggles and Social Change, Christopher Chase-Dunn and Paul Almeida explore how global change stimulates the formation and shape of such movements. Contending that large-scale economic shifts condition the pattern of social movement mobilizations around the world, the authors trace these trends back to premodern societies, revealing how severe disruptions of indigenous communities led to innovative collective actions throughout history. Drawing on historical case studies, world system and protest event analysis, and social networks, they also examine the influence of global change processes on local, national, and transnational social movements and explain how, in turn, these movements shape institutional shifts. Touching on hot-button topics including global warming, immigrant rights, protests, the rise of right-wing populism, and the 2008 financial crisis, the book also explores a broad range of premodern social movements from indigenous people in the Americas, Mesopotamia, and China. The authors pay special attention to periods of disruption and external threats as well as the role of elites, emotions, charisma, and religion or spirituality in shaping protest movements. Providing sweeping coverage, Global Struggles and Social Change is perfect for students and anyone interested in globalization, international and comparative politics, political sociology, and communication studies. **The Vaal Uprising of 1984 & the Struggle for Freedom in South Africa** Franziska Rueedi, 2021 Offers new insights into the struggle against Apartheid and the poverty and inequality that instigated political resistance. **Music and Social Change in South Africa** Kathryn Olsen, 2014-10-03 Music and Social Change in

South Africa looks at contemporary maskanda a folk musical genre distinguished by fast guitar picking and blues style vocal intonation against the backdrop of South Africa's history. A performance practice that emerged in the early decades of the twentieth century among Zulu migrant workers, maskanda is strongly associated with young Zulu men's experiences of repression and dislocation during imperial and more particularly apartheid rule. Working closely with translated song lyrics and musical notation and applying musical and socio-political analysis to this music and its cultural context, Olsen argues that maskanda offers insight into how the post-apartheid ideal of social transformation is experienced by those who were marginalized for most of the twentieth century. Drawing on a decade of research, Olsen strives to demystify the Zulu part of contemporary experience in South Africa and to reveal some of the complexities of the social, economic and political landscape of contemporary South Africa.

South Africa's Struggle to Remember Kim Wale, 2016-04-14

Transitional justice studies typically focuses on how nations remember, face and deal with histories of past violence. This book however shifts the frame from national discourses of transitional justice onto local memory actors who attempt to engage with these broader systems of meaning from below. The case study is based on the memory struggles of individuals and groups who are attempting to gain access to the discourses and benefits associated with dominant memory identities of victim and veteran in the context of post-transition South Africa. They share a common history of squatter resistance in the Western Cape in the 1980s and a common struggle for inclusion in dominant memory frameworks. The main theme of this book is the politics of memory as it relates to the conversation between national and local memory. Integrated within this theme is the further theme of alternative histories and counter-memories of struggle from below. In focusing on counter-memories of violence and transition, this book aims to tell a different version of South African liberation history in relation to the dominant narrative. It analyses local memory actors' attempts to bring their lived histories into conversation with national discourses of reconciliation and the national liberation struggle. In doing so, it unpacks a memory paradox occurring within these narratives which highlights the politics of inclusion and exclusion within the frames of transitional justice knowledge. On the one hand, this alternate story exposes the paradox between local and national memory while on the other hand it brings into focus the local experience of the intersection between international transitional justice discourses and national transition politics. This book will be of local and international interest to scholars and students in the field of transitional justice, memory politics, national liberation struggle and South African historiography. It will also be of interest to a broader South Africa public as it offers a deeper understanding of South Africa's history which challenges taken-for-granted transitional justice frames of knowledge.

Political Identity and Social Change Jamie Frueh, 2012-02-01 Political Identity and Social Change builds upon the constructivist theory of political identity to explore the social changes that accompanied the end of apartheid in South Africa To gain a better understanding of how structures of identity changed along with the rest of South Africa s institutions Frueh analyzes three social and political conflicts the Soweto uprisings of 1976 the reformist constitutional debates of 1983 1984 and post apartheid crime Analyzing these conflicts demonstrates how identity labels function as structures of social discourse how social activity is organized through these structures and how both the labels and their power have changed during the course of South Africa s transition In this way the book contributes not only to the study of South African society but also provides lessons about the relationship between identity and social change
