The Struggle for Democracy Christopher Meckstroth, 2015-07-01 Revolutionaries counter revolutionaries and reformers the world over appeal to democracy to justify their actions But when political factions compete over the right to act in the people's name who is to decide Although the problem is as old as the great revolutions of the seventeenth and eighteenth centuries events from the Arab Spring to secession referendums suggest that today it is hardly any closer to being solved This book defends a new theory of democratic legitimacy and change that provides an answer Christopher Meckstroth shows why familiar views that identify democracy with timeless principles or institutions fall into paradox when asked to make sense of democratic founding and change Solving the problem he argues requires shifting focus to the historical conditions under which citizens work out what it will mean to govern themselves in a democratic way The only way of sorting out disputes without faith in progress is to show in Socratic fashion that some parties claims to speak for the people cannot hold up even on their own terms Meckstroth builds his argument on provocative and closely argued interpretations of Plato Kant and Hegel suggesting that familiar views of them as foundationalist metaphysicians misunderstand their debt to a method of radical doubt pioneered by Socrates Recovering this tradition of antifoundational argument requires rethinking the place of German idealism in the history of political thought and opens new directions for contemporary democratic theory The historical and Socratic theory of democracy the book defends makes possible an entirely new way of approaching struggles over contested notions of progress popular sovereignty political judgment and democratic change

Exterminate Technology Ciano Aydin, 2021-01-21 This book investigates how we should form ourselves in a world saturated with technologies that are profoundly intruding in the very fabric of our selfhood New and emerging technologies such as smart technological

environments imaging technologies and smart drugs are increasingly shaping who and what we are and influencing who we ought to be How should we adequately understand evaluate and appreciate this development Tackling this question requires going beyond the persistent and stubborn inside outside dualism and recognizing that what we consider our inside self is to a great extent shaped by our outside world Inspired by various philosophers especially Nietzsche Peirce and Lacan this book shows how the values goals and ideals that humans encounter in their environments not only shape their identities but also enable them to critically relate to their present state The author argues against understanding technological self formation in terms of making ourselves better stronger and smarter Rather we should conceive it in terms of technological sublimation which redefines the very notion of human enhancement In this respect the author introduces an alternative more suitable theory namely Technological Sublimation Theory TST Extimate Technology will be of interest to scholars and advanced students working in philosophy of technology philosophy of the self phenomenology pragmatism and history of philosophy The Open Access version of this book available at <http://www.taylorfrancis.com/books/9781003139409> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Commune, *Social Domains of Truth* Lambert Zuidervaar, 2023-03-10 Truth is in trouble In response this book presents a new conception of truth It recognizes that prominent philosophers have questioned whether the idea of truth is important Some have asked why we even need it Their questions reinforce broader trends in Western society where many wonder whether or why we should pursue truth Indeed some pundits say we have become a post truth society Yet there are good reasons not to embrace the cultural Zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and

socially significant idea This book explains why First it argues that propositional truth is only one kind of truth an important kind but not all important Then it shows how propositional truth belongs to the more comprehensive process of truth as a whole This process is a dynamic correlation between human fidelity to societal principles and a life giving disclosure of society The correlation comes to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary The final chapters lay out five such domains science politics art religion and philosophy Anyone who cares about the future of truth in society will want to read this pathbreaking book *Mimesis as Make-Believe* Kendall L. Walton,1990 Representations in visual arts and fiction play an important part in our lives and culture Walton presents a theory of the nature of representation which shows its many varieties and explains its importance His analysis is illustrated with examples from film art literature and theatre
