International Students and Scholars in the United States Heike C. Alberts, Helen D. Hazen, 2013-02-12 An international team of academics and experienced practitioners here bring together scholarship on academic migrants to the United States the world's top recipient of academic talent They examine the multidirectional migration patterns of academic migrants adaptation challenges and the roles played by international students and faculty *Education, Mobilities and Migration* Madeleine Arnot, Claudia Schneider, Oakleigh Welply, 2018-02-05 Within the context of increased global migration and mobility education occupies a central role which is being transformed by new human movements and cultural diversity flows and networks Studies under the umbrella terms of migration mobility and mobilities reveal the complexity of these concepts The field of study ranges from global child mobility as a response to poverty to the reconceptualising of notions of inclusion in relation to pastoralist lifestyles to the ways in which new offshore institutions and transnational diasporas shape the educational experiences of students families and teachers At the heart of this new research is a need to explore how identity integration and social stratification play a role in the story of global migration between and within the Global North and South This volume focuses on three major themes poverty migration social mobility and social reproduction networks of migration within and across national education systems and higher education and international student mobility and the concerns and opportunities that go along with this mobility The international group of researchers who have contributed to this book demonstrate how educational institutions are part of a common global project characterised by fluidity how the social fabric of educational institutions responds to demographic diversity and how new social differentiations occur as a result of human movement By bringing together these contributions a number of important theoretical and empirical methodological dimensions are identified that need more attention within the growing field of migration and education

studies This volume shows how mobilities and transnational interconnectedness create multiple interactions that tie our different educational projects together This book was originally published as a special issue of *Compare A Journal of Comparative and International Education* **Exhibiting Europe in Museums** Wolfram Kaiser,Stefan Krankenhagen,Kerstin Poehls,2014-04-01 Museums of history and contemporary culture face many challenges in the modern age One is how to react to processes of Europeanization and globalization which require more cross border cooperation and different ways of telling stories for visitors This book investigates how museums exhibit Europe Based on research in nearly 100 museums across the Continent and interviews with cultural policy makers and museum curators it studies the growing transnational activities of state institutions societal organizations and people in the museum field such as attempts to Europeanize collection policy and collections as well as different strategies for making narratives more transnational like telling stories of European integration as shared history and discussing both inward and outward migration as a common experience and challenge The book thus provides fascinating insights into a fast changing museum landscape in Europe with wider implications for cultural policy and museums in other world regions *Advances in Interdisciplinary Language Policy* François Grin,László Marácz,Nike K. Pokorn,2022-01-15 This book stems from the joint effort of 25 research teams across Europe representing a dozen disciplines from the social sciences and humanities resulting in a radically novel perspective to the challenges of multilingualism in Europe The various concepts and tools brought to bear on multilingualism are analytically combined in an integrative framework starting from a core insight in its approach to multilingualism Europe is pursuing two equally worthy but non converging goals namely the mobility of citizens across national boundaries and hence across languages and cultures and the preservation of Europe s diversity which presupposes that each locale nurtures its linguistic and cultural uniqueness and has the means to include newcomers in its specific linguistic and cultural environment In this book scholars from applied linguistics economics the education sciences finance geography history law political science philosophy psychology sociology and translation studies apply their specific approaches to this common challenge Without compromising the state of the art analysis proposed in each chapter particular attention is devoted to ensuring the cross disciplinary accessibility of concepts and methods making this book the most deeply interdisciplinary volume on language policy and planning published to date **Researching Higher Education** Jennifer M. Case,Jeroen Huisman,2015-10-14 Research on higher education has yielded many insights that have improved our theoretical and practical understanding but there are still many themes that continue to appear on research agendas provoking renewed focus on these complex questions and problems Researching Higher Education explores these issues examining topics such as equity in access and participation the relationship between higher education and society how and what students learn and the professional development of academics In this volume contributors from Europe Australia Africa and the US critically address ongoing issues with a set of key questions to guide their analysis What do we know What are the missing links and

gaps in past research What are the implications for further research Key themes include The nature of higher education Higher education and society Staff and students in higher education Teaching and learning Curriculum and assessment Critical engaging and international in scope Researching Higher Education will be a valuable guide for academics researchers postgraduate students and policy makers in the higher education community
