Approaching the subject area from a variety of perspectives—doctrinal analysis, behavioral analysis, law and economics, and theoretical—the book examines familiar areas of contract law as practiced in the UK and US. Topics include contract theory and structure, contract formation and defects of consent, policing contracts and the duty of good faith, contract interpretation, damages, speciality contracts, and legal reform. The volume provides a thorough assessment of the current state of commercial contract law in the UK and US and addresses the strengths and weaknesses of the national and European approaches to many issues of contract law. In particular, it focuses on how commercial contract law should be improved and whether harmonization of the different contract law regimes is a suitable and appropriate solution.

*Harvesting the Blackberry*. Graham Tubbs, Terry Gillett, 2011. In the mid 1990s almost nobody knew what the Internet was. The few businesspeople and hardcore geeks who used electronic mail had to hunt for telephone connectors so they could hook up their laptops on the move. Cell phones were bulky and expensive. One-way pagers delivered only short messages. Texting didn't exist. One of the driving forces behind the wirelessly connected world we take for granted today was the emergence of the BlackBerry. In 1995 a tiny company from Ontario, Research In Motion, conceived of an e-mail device that users could wear on their belts. To reduce the amount of space required by the electronic components, RIM needed to partner with a semiconductor company that could integrate the different functions into one microchip. Enter Intel. Though the

BlackBerry's success seems like a foregone conclusion today both operations faced enormous challenges Harvesting the BlackBerry offers an insider's perspective on how the world's number one semiconductor company and an unknown start up overcame technical obstacles and internal politics to produce one of the most ubiquitous computing devices of our time
