Caves, 2005 A first class work of reference that will be both an essential resource for independent study as well as a useful aid in teaching a solid but also provocative starting point for wider exploration of the city **Carving Out the Commons** Amanda Huron, 2018-03-13 An investigation of the practice of commoning in urban housing and its necessity for challenging economic injustice in our rapidly gentrifying cities Provoked by mass evictions and the onset of gentrification in the 1970s tenants in Washington D C began forming cooperative organizations to collectively purchase and manage their apartment buildings These tenants were creating a commons taking a resource housing that had been used to extract profit from them and reshaping it as a resource that was collectively owned by them In *Carving Out the Commons* Amanda Huron theorizes the practice of urban commoning through a close investigation of the city's limited equity housing cooperatives Drawing on feminist and anticapitalist perspectives Huron asks whether a commons can work in a city where land and other resources are scarce and how strangers who may not share a past or future come together to create and maintain commonly held spaces in the midst of capitalism Arguing against the romanticization of the commons she instead positions the urban commons as a pragmatic practice Through the practice of commoning she contends we can learn to build communities to challenge capitalism's totalizing claims over life **Seeking**

Shelter on the Pacific Rim Gary Dymksi, Dorene Isenberg, 2018-10-24 This innovative book analyzes the changes that financial globalization is bringing about in the housing and home finance markets of the United States, Japan and South Korea with special attention to the circumstances of women in obtaining housing credit and personal security. The book's focus on changes in the residential and housing finance markets serves as a window for an integrated examination of how the liberalization of national financial markets has affected the relationship among all players in each of the three economies: government markets and individual citizens. Through this examination, Housing Finance Futures develops a new critical response to economic globalization based on a groundbreaking concept: the social efficiency of policy and market shifts.

The meaning of housing Clapham, David, 2005-07-20 This book offers a fresh new approach to the study of housing. It explores the meaning that housing has for individuals and households by examining housing pathways. Housing pathways refer to the varying household forms that individuals experience and the housing routes that they take over time. The book argues that housing has increasingly become a means to an end rather than an end in itself. The end is personal fulfilment and the main task of housing research is to elucidate the links. In this pursuit, the concepts of identity and lifestyle are key. Specifically, the book examines the structure and functioning of households and links this to changing discourses of the family. It explores the important interconnections between housing and employment, considers the relationship between people and the physical aspects of a house and its location, looks at housing in terms of lifestyle choice from youth to old age and discusses the implications of the pathways approach for housing policy and future research in the field. The meaning of housing is recommended to anyone researching and studying housing and particularly to those wishing to engage with the new research agenda set out here.

For All the People John Curl, 2012-07-01 Seeking to reclaim a history that has remained largely ignored by most historians, this dramatic and stirring account examines each of the definitive American cooperative movements for social change: farmer union, consumer and communalist, that have been all but erased from collective memory. Focusing far beyond one particular era, organization, leader or form of cooperation, *For All the People* documents the multigenerational struggle of the American working people for social justice. While the economic system was in its formative years, generation after generation of American working people challenged it by organizing visionary social movements aimed at liberating themselves from what they called wage slavery. Workers substituted a system based on cooperative work and constructed parallel institutions that would supersede the institutions of the wage system. With an expansive sweep and breathtaking detail, this scholarly yet eminently readable chronicle follows the American worker from the colonial workshop to the modern mass assembly line, from the family farm to the corporate hierarchy, ultimately painting a vivid panorama of those who built the United States and those who will shape its future. John Curl, with over forty years of experience as both an active member and scholar of cooperatives, masterfully melds theory, practice, knowledge and analysis to present the definitive history from below of cooperative America. This second edition contains a new introduction by

Ishmael Reed a new author's preface discussing cooperatives in the Great Recession of 2008 and their future in the 21st century and a new chapter on the role co-ops played in the Food Revolution of the 1970s
