Making Geography Matter Noel Castree, Trevor Barnes, Jennifer Salmond, 2025-02-28 What is the purpose of Geography What do geographers study and why How do they seek to shape the world they interrogate This book addresses these questions by examining the lives and works of individual geographers both past and present Like all disciplines Geography is no more nor less than the collective endeavours of researchers and teachers operating in specific contexts The contexts both shape and are shaped by these individuals This book's biographical and autobiographical chapters transport readers to the times and places where geographers have sought to make Geography matter The result is a more vivid grounded understanding of the discipline than the many high level surveys of geographic thought paradigms currently written for university students This book's accessible essays each conclude with a study task Making Geography Matter is aimed at university students and their teachers who wish to understand the goals history and evolving practice of Geography It provides an alternative perspective both concrete and engaging to the many student focussed texts that map out numerous isms and ologies

The Geography of Gandhāran Art Wannaporn Rienjang, Peter Stewart, 2019-03-15 Gandh ran art is usually regarded as a single phenomenon a unified regional artistic tradition or school Indeed it has distinctive visual characteristics materials and functions and is characterized by its extensive borrowings from the Graeco Roman world Yet this tradition is also highly varied Even the superficial homogeneity of Gandh ran sculpture which constitutes the bulk of documented artistic material from this region in the early centuries AD belies a considerable range of styles technical approaches iconographic choices and levels of artistic skill The geographical variations in Gandh ran art have received less attention than they deserve Many surviving Gandh ran artefacts are unprovenanced and the difficulty of tracing substantial assemblages of sculpture to particular sites has obscured the fine grained picture of its artistic geography Well documented modern excavations at particular sites and areas such as the projects of the Italian Archaeological Mission in the Swat Valley have demonstrated the value of looking at sculptures in context and considering distinctive aspects of their production use and reuse within a specific locality However insights of this kind have been harder to gain for other areas including the Gandh ran heartland of the Peshawar basin Even where large collections of artworks can be related to individual sites the exercise of comparing material within and between

these places is still at an early stage The relationship between the Gandhara artists or workshops particular stone sources and specific sites is still unclear Addressing these and other questions this second volume of the Gandhara Connections project at Oxford University's Classical Art Research Centre presents the proceedings of a workshop held in March 2018 Its aim is to pick apart the regional geography of Gandhara art presenting new discoveries at particular sites textual evidence and the challenges and opportunities of exploring Gandhara's artistic geography
