Thomas,2024-01-17 The animal kingdom operates by ancient rules and the deer in our woods and backyards can teach us many of them but only if we take the time to notice In the fall of 2007 in southern New Hampshire the acorn crop failed and the animals who depended on it faced starvation Elizabeth Marshall Thomas began leaving food in small piles around her farmhouse Soon she had over thirty deer coming to her fields and her naturalist s eye was riveted How did they know when to come all together and why did they sometimes cooperate sometimes compete Throughout the next twelve months she observed the local deer families as they fought through a rough winter bred fawns in the spring fended off coyotes a bobcat a bear and plenty of hunters and made it to the next fall when the acorn crop was back to normal As she hiked through her woods spotting tree rubbings deer beds and deer yards she discovered a vast hidden world Deer families are run by their mothers Local families arrange into a hierarchy They adopt orphans they occasionally reject a child they use complex warnings to signal danger they mark their territories they master local microclimates to choose their beds they send countless coded messages that we can read if only we know what to look for Just as she did in her beloved books *The Hidden Life of Dogs* and *Tribe of Tiger* Thomas describes a network of rules that have allowed earth s species to coexist for millions of years Most of us have lost touch with these rules yet they are a deep part of us from our ancient evolutionary past *The Hidden Life of Deer* is a narrative masterpiece and a naturalist s delight *The Hidden Life of the Sixth Dalai Lama*

The bestselling sequel to *The Hidden Life of Dogs* proves once and for all that no dog is an island. Wolves and the Wolf Myth in American Literature S.K. Robisch, 2009-05-28. The wolf is one of the most widely distributed canid species historically ranging throughout most of the Northern Hemisphere. For millennia it has also been one of the most pervasive images in human mythology, art, and psychology. *Wolves and the Wolf Myth in American Literature* examines the wolf's importance as a figure in literature from the perspectives of both the animal's physical reality and the ways in which writers imagine and portray it. Author S.K. Robisch examines more than two hundred texts written in North America about wolves or including them as central figures. From this foundation, he demonstrates the wolf's role as an archetype in the collective unconscious, its importance in our national culture, and its ecological value. Robisch takes a multidisciplinary approach to his study, employing a broad range of sources: myths and legends from around the world, symbology, classic and popular literature, films, the work of scientists, in a number of disciplines, human psychology, and field work conducted by himself and others. By combining the fundamentals of scientific study with close readings of wide-ranging literary texts, Robisch astutely analyzes the correlation between actual living wolves and their representation on the page and in the human mind. He also considers the relationship between literary art and the natural world and argues for a new approach to literary study: an ecocriticism that moves beyond anthropocentrism to examine the complicated relationship between humans and nature.

The Hidden Life of Life Elizabeth Marshall Thomas, 2018-03-03. An iconoclast and best-selling author of both nonfiction and fiction, Elizabeth Marshall Thomas has spent a lifetime observing, thinking, and writing about the cultures of animals such as lions, wolves, dogs, deer, and humans. In this compulsively readable book, she provides a plainspoken, big picture look at the commonality of life on our planet from

the littlest microbes to the largest lizards Inspired by the idea of symbiosis in evolution that all living things evolve in a series of cooperative relationships Thomas takes readers on a journey through the progression of life Along the way she shares the universal likenesses experiences and environments of Gaia s creatures from amoebas in plant soil to the pets we love from proud primates to Homo sapiens hunter gatherers on the African savanna Ferribly rejecting anthropodenial the notion that nonhuman life does not share characteristics with humans Thomas instead shows that paramecia can learn plants can communicate humans aren t really as special as we think we are and that it doesn t take a scientist to marvel at the smallest inhabitants of the natural world and their connections to all living things A unique voice on anthropology and animal behavior Thomas challenges scientific convention and the jargon that prevents us all from understanding all living things better This joyfully written book is a fascinating look at the challenges and behaviors shared by creatures from bacteria to larvae to parasitic fungi a potted hyacinth to the author herself and all those in between

Dog's Best Friend Mark Derr,2004-04 A comprehensive humane and bemused tour of the dog human relationship Dog s Best Friend combines anecdote research and reportage to illuminate our complex rapport with our cherished canine companions Tracking our national obsession with an animal that now outnumbers children in American households Mark Derr chronicles the evolution of the culture of the dog from the prehistoric domestication of tamed wolves to the modern horrors of overbreeding and inbreeding Passionate about his subject and intent on sharing his zeal Derr defends dogs with wit and flare producing here a quirky informative and fitting tribute to our love affair with canines big and small

Dog's Best Friend? John Sorenson,Atsuko Matsuoaka,2019-11-14 In almost 40 per cent of households in North America dogs are kept as companion animals Dogs may be man s best friends but what are humans to dogs If these animals loyalty and unconditional love have won our hearts why do we so often view closely related wild canids such as foxes wolves and coyotes as pests predatory killers and demons Re examining the complexity and contradictions of human attitudes towards these animals Dog s Best Friend looks at how our relationships with canids have shaped and also been transformed by different political and economic contexts Journeying from ancient Greek and Roman societies to Japan s Edo period to eighteenth century England essays explore how dogs are welcomed as family consumed in Asian food markets and used in Western laboratories Contributors provide glimpses of the lives of street dogs and humans in Bali India Taiwan and Turkey and illuminate historical and current interactions in Western societies The book delves into the fantasies and fears that play out in stereotypes of coyotes and wolves while also acknowledging that events such as the Wolf Howl in Canada s Algonquin Park indicate the emergence of new popular perspectives on canids Questioning where canids belong how they should be treated and what rights they should have Dog s Best Friend reconsiders the concept of justice and whether it can be extended beyond the limit of the human species
