Skin Of Culture Investigating The New Electronic Reality:

The Skin of Culture Derrick De Kerckhove, 1995 *Politics, Society, and the Media* Paul Wingfield

Nesbitt-Larking, 2007-01-01 Nesbitt Larking challenges his readers to become critical consumers of media and provides a number of strategies to encourage them to do so Nick Baxter Moore Brock University **User Error** Ellen Rose, 2003 User Error doesn't argue that we should simply reject computers but neither does it uncritically embrace the current state of affairs but offers other options

Ordinary Consumption Jukka Gronow, Alan Warde, 2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view This collection emphasises ordinary rather than extraordinary items routine and repetitive behaviour rather than conscious decision making It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity Each essay argues one or more of these points for the most part using new empirical material from several different national contexts The topics analysed include shopping in Taiwan second home ownership in France environmental considerations concerning food choice in Denmark the take up of new domestic technologies in Finland and kitchen design in England Key concepts like tradition routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel Weber Durkheim and Bourdieu Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research

Identity and Alterity PEACE--Phenomenology for East-Asian Circle. Conference, 2010 **Understanding Media, Today** Matteo Ciascellardi, Emanuela Patti, 2011-12-01

Understanding Media Today McLuhan in the Era of Convergence Culture **Liquid Architecture** Pierangelo Marco Scravaglieri, 2023-12-22 Liquid Architecture challenges the idea of architecture as a fixed inert container and reconceptualises it as a body whose boundaries are rather blurred and ever changing This book moves away from form as the primary driver of spatial protocols and explores what the built environment might look like when viewed through the lenses of a wet ontology that is attentive to fluidity flows and territorial dynamism A reconfiguration of architectural materials and authorship is thus considered leading in turn to an exploration of the ethical dimensions of co designing with natural systems of various viscosities through liquid paradigms The book examines a set of principles for practice led discoveries that incorporate hybrid mixed media with the author's intersubjective relationship with liquid matter Drawing from qualitative based analytical investigation models the text allows comprehension of the liquid phenomena via material contextualisation of an ever becoming research setting Through a practical and theoretical engagement with the ontology of liquids the reader is exposed to a range of design led experiments and creative propositions visualisation systems construction and testing of physical models that collectively translate into a series of novel insights for architectural agendas This book will be of

interest to architecture and design research students and academics because it advocates the need for a more symbiotic and resilient approach to natural systems which could benefit from the integration of regenerating material flows into our buildings and urban settlements

Image Evolution Lars C. Grabbe,Patrick Rupert-Kruse,Norbert M. Schmitz,2019-01-23 The history of images can be described as a history of technology and mediality The development of images is deeply rooted in the potentials of media technologies and the numerous human inventions in the range of traditional craftsmanship engineering science computer science and art and design The factual embedding of images in the historical technological processes constitutes a complex structure of an autonomous image evolution that must be highlighted characterized and analyzed by the interdisciplinary academic discourses that are related to the functions and structures of visibility pictoriality and forms of multi sensoric representations The chosen term evolution is deliberately indicating structural laws that underlie historical events These laws are intentional and logical processes of a historical and technological interdependency In this interdependency technology is evolving out of its inherent structures and additionally embedded in anthropological conditions and sociocultural dynamics In this context we should work with the concept of an image evolution Slippery Pastimes Joan Nicks,Jeannette Sloniowski,2009-10-21 Sixteen essays written by specialists from many fields grapple with the problem of a popular culture that is not very popular but is seen by most as vital to the body politic whether endangered by globalization or capable of politically progressive messages for its audiences Slippery Pastimes covers a variety of topics Canadian popular music from rock n roll to country hip hop to pop Celtic television advertising tourism sport and even postage stamps As co editors Nicks and Sloniowski have taken an open view of the Canadian Popular and contributors have approached their topics from a variety of perspectives including cultural studies women s studies film studies sociology and communication studies The essays are accessibly written for undergraduate students and interested general readers International Journal of McLuhan Studies 2012-13 Matteo Cistellardi (ed.),2014-09-01 Education Overload From Total Surround to Pattern Recognition **Understanding Problems of Social Pathology**,2006-01-01 A social reality including social pathology is constantly being constructed anew in the process of confrontation of perspectives and definitions of individuals institutions and social groups Therefore what interests the authors of the book more than the disputes on the right definition is the understanding of social pathology phenomena their causes mechanisms and social costs Complex and multidimensional as it is social reality is best described from various perspectives For that reason a potentially interesting and fruitful interdisciplinary approach characterises the book It contains mainly texts of psychologists who work at the Jagiellonian University in Cracow The articles of sociologists lawyers and one theoretician of education broaden the horizon and thus

contribute new insights to the entirety of the book The body of articles predominantly relates to Polish reality as well as stems from the experience of the Polish society in the period of political transformation No less interesting are the articles on the pathology of political discourse community policing problems in France and issues of social concern victims of violence problems of the elderly and collective behaviour The volume is of interest for social scientists and professionals as well as for students
