Psychosis Jozef Corveleyn, Paul Moyaert, 2003 These days a book on psychosis composed entirely of psychoanalytic contributions is a rarity It can create surprise that in what some have called the decade of the brain scholars on psychoanalysis psychiatry and psychology still continue to develop a project of understanding and explaining psychosis from a phenomenological and psychodynamic perspective And yet such a project not only continues to exist in spite of the dominance of the neuro biological model but elaborates itself self consciously in contradistinction to and even as a corrective to this model The contributors to this publication share the following concern The present day biologisation and neurologisation of psychiatry has dangerously de emphasized the concern with the individual suffering soul with the psyche in psychiatry But if this means a gain in the scientific status of psychiatry it is at the same time a loss for patients and practitioners alike Most of the contributions made to this volume build globally on the ideas of De Waelhens known for his studies in phenomenology on Heidegger and Merlau Ponty as well as for his phenomenological and psychoanalytical research in psychosis The limits of phenomenology as formulated by De Waelhens in the last chapter of his *La philosophie et les experiences naturelles* 1961 incited him to broaden the scope of his perspective to unravel the basic existential structures to Dasein it is necessary to study human existence in its vulnerability and it is exactly this vulnerability that breaks through in phenomena such as schizophrenia and paranoia

A General Introduction to Psychoanalysis Sigmund Freud, 2015-11-16 I DO not know how familiar some of you may be either from your reading or from hearsay with psychoanalysis But in keeping with the title of these lectures A General Introduction to Psychoanalysis I am obliged to proceed as though you knew nothing about this subject and stood in need of preliminary instruction To be sure this much I may presume that you do know namely that psychoanalysis is a method of treating nervous patients medically And just at this point I can give you an example to illustrate how the procedure in this field is precisely the reverse of that which is the rule in medicine Usually when we introduce a patient to a medical technique which is strange to him we minimize its difficulties and give him confident promises concerning the result of the treatment When however we undertake psychoanalytic treatment with a neurotic patient we proceed differently We hold before him the difficulties of the method its length the exertions and the sacrifices which it will cost him and as to the result we tell him that we make no definite promises that the result depends on his conduct on his understanding on his adaptability on his perseverance We have of course excellent motives for conduct which seems so perverse and into which you will perhaps gain insight at a later point in these lectures Do not be offended therefore if for the present I treat you as I treat these neurotic patients Frankly I shall dissuade you from coming to hear me a second time With this intention I shall show what imperfections are necessarily involved in the teaching of psychoanalysis and what difficulties stand in the way of gaining a personal judgment I shall show you how the whole trend of your previous training

and all your accustomed mental habits must unavoidably have made you opponents of psychoanalysis and how much you must overcome in yourselves in order to master this instinctive opposition Of course I cannot predict how much psychoanalytic understanding you will gain from my lectures but I can promise this that by listening to them you will not learn how to undertake a psychoanalytic treatment or how to carry one to completion Furthermore should I find anyone among you who does not feel satisfied with a cursory acquaintance with psychoanalysis but who would like to enter into a more enduring relationship with it I shall not only dissuade him but I shall actually warn him against it As things now stand a person would by such a choice of profession ruin his every chance of success at a university and if he goes out into the world as a practicing physician he will find himself in a society which does not understand his aims which regards him with suspicion and hostility and which turns loose upon him all the malicious spirits which lurk within it **The Collected**
