history of biomedical innovation to date in pharmaceutical medicine he argues that technological capability alone is not enough and that the responsible adoption of enhancement technologies will require active ethical deliberation and robust public policy discourse Goundrey Smith argues that biomedical technology ethics and public policy together form an essential triad for appropriate future enhancement technology adoption This approach helps to ensure that biomedical technologies introduced will be common goods and to reduce the risk of their instrumental use The use of any technology is closely linked to its sociopolitical and cultural context and drawing on Augustine's *The City of God* Goundrey Smith presents a theological vision for good biomedical technology innovation in human society *Deliver Me* Elle Nash, 2023-10-03
