Stroke Rehabilitation:

Stroke Rehabilitation E-Book Glen Gillen, Dawn M. Nilsen, 2020-09-13 NEW Revised and expanded content keeps you up to date on the latest information in all areas of stroke rehabilitation NEW Updated references reflect the changes that have been made in the field NEW Assessment Appendix and Pharmacological Appendix UPDATED Resources for Educators and Students on Evolve *Stroke Rehabilitation* LeeAnne M. Carey, 2012-06-28 Stroke Rehabilitation Insights from Neuroscience and Imaging informs and challenges neurologists rehabilitation therapists imagers and stroke specialists to adopt more restorative and scientific approaches to stroke rehabilitation based on new evidence from neuroscience and neuroimaging literatures The fields of cognitive neuroscience and neuroimaging are advancing rapidly and providing new insights into human behavior and learning Similarly improved knowledge of how the brain processes information after injury and recovers over time is providing new perspectives on what can be achieved through rehabilitation Stroke Rehabilitation explores the potential to shape and maximize neural plastic changes in the brain after stroke from a multimodal perspective Active skill based learning is identified as a central element of a restorative approach to rehabilitation The evidence behind core learning principles as well as specific learning strategies that have been applied to retrain lost functions of movement sensation cognition and language are also discussed Current interventions are evaluated relative to this knowledge base and examples are given of how active learning principles have been successfully applied in specific interventions The benefits and evidence behind enriched environments is reviewed with examples of potential application in stroke rehabilitation The capacity of adjunctive therapies such as transcranial magnetic stimulation to modulate receptivity of the damaged brain to benefit from behavioral interventions is also discussed in the context of this multimodal approach Focusing on new insights from neuroscience and imaging the book explores the potential to tailor interventions to the individual based on viable brain networks *Stroke Rehabilitation* Robert Fawcus, 2008-04-15 There is a continuing need for education about stroke and its management both in acute and chronic stages This book aims to facilitate interdisciplinary cooperation which is essential if rehabilitation programmes are to be optimally effective Any collaborative enterprise is heavily dependent upon the relationship that develops between the participants Here a group of health care professionals give their own perspective on the daily problems they encounter and the specific skills involved in dealing with these problems Written in an informative and accessible style this book will help professionals involved in the management of stroke to understand the role of other members of the rehabilitation team and hence provide coordinated care for the patient Robert Fawcus is a Consultant Speech and Language Therapist at the Nuffield Hospital Tunbridge Wells and was formerly Professor of Clinical Communication Studies at City University London **Clinical Pathways in Stroke Rehabilitation** Thomas Platz, 2021-01-14 This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation Consequences of diseases e g impairments and activity limitations are addressed in rehabilitation with the

overall goal to reduce disability and promote participation Based on the available best external evidence clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision making The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors as well as when and in which settings to provide rehabilitation over the course of recovery post stroke Each chapter starts with a description of the clinical problem encountered This is followed by a systematic but concise review of the evidence RCTs systematic reviews and meta analyses that is relevant for clinical decision making and comments on assessment therapy training technology medication and the use of technical aids as appropriate Based on these summaries clinical algorithms pathways are provided and the main clinical decision situations are portrayed The book is invaluable for all neurorehabilitation team members clinicians nurses and therapists in neurology physical medicine and rehabilitation and related fields It is a World Federation for NeuroRehabilitation WFNR educational initiative bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents It can be used for both clinical decision making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives Stroke Recovery and Rehabilitation Richard Harvey, Richard F. Macko, Joel Stein, Carolee Winstein, Richard D. Zorowitz, 2008-11-20 A Doody's Core Title 2012 Stroke Recovery and Rehabilitation is the new gold standard comprehensive guide to the management of stroke patients Beginning with detailed information on risk factors epidemiology prevention and neurophysiology the book details the acute and long term treatment of all stroke related impairments and complications Additional sections discuss psychological issues outcomes community reintegration and new research Written by dozens of acknowledged leaders in the field and containing hundreds of tables graphs and photographic images Stroke Recovery and Rehabilitation features The first full length discussion of the most commonly encountered component of neurorehabilitation Multi specialty coverage of issues in rehabilitation neurology PT OT speech therapy and nursing Focus on therapeutic management of stroke related impairments and complications An international perspective from dozens of foremost authorities on stroke Cutting edge practical information on new developments and research trends Stroke Recovery and Rehabilitation is a valuable reference for clinicians and academics in rehabilitation and neurology and professionals in all disciplines who serve the needs of stroke survivors *Stronger After Stroke* Peter Levine, 2008-10-01 Billions of dollars are spent on stroke related rehabilitation research and treatment techniques but most are not well communicated to the patient or caregiver As a result many stroke survivors are treated with outdated or ineffective therapies Stronger After Stroke puts the power of recovery in the reader's hands by providing simple to follow instructions for reaching the highest possible level of healing Written for stroke survivors their caregivers and loved ones Stronger After Stroke presents a new and more effective treatment philosophy that is startling in its simplicity stroke survivors recover by using the same learning

techniques that anyone uses to master anything Basic concepts are covered including Repetition of task specific movements Proper scheduling of practice Challenges at each stage of recovery Setting goals and recognizing when they have been achieved The book covers the basic techniques that can catapult stroke survivors toward maximum recovery Stronger After Stroke bridges the gap between stroke survivors and what they desperately need easily understandable and scientifically accurate information on how to achieve optimal rehabilitation

Stroke Rehabilitation, An Issue of Physical Medicine and Rehabilitation Clinics of North America John Chae, 2015-11-11 This issue of Physical Medicine Rehabilitation Clinics will focus on stroke rehabilitation and will include articles such as Mechanisms of stroke recovery Insights from basic sciences Stroke recovery and predictors of rehabilitation outcomes Upper limb motor impairments Post stroke spasticity Communication disorders and dysphagia Neuropharmacology of Recovery Robotic therapy and many more

Stroke Rehabilitation Glen Gillen, EdD, OTR, FAOTA, 2015-08-12 Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's Stroke Rehabilitation A Function Based Approach 4th Edition Using a holistic and multidisciplinary approach this text remains the only comprehensive evidence based stroke rehabilitation resource for occupational therapists The new edition has been extensively updated with the latest information along with more evidence based research added to every chapter As with previous editions this comprehensive reference uses an application based method that integrates background medical information samples of functionally based evaluations and current treatment techniques and intervention strategies Evidence based clinical trials and outcome studies clearly outline the basis for stroke interventions UNIQUE Survivor's Perspectives help readers understand the stroke rehabilitation process from the client point of view UNIQUE Case studies challenge readers to apply rehabilitation concepts to realistic scenarios UNIQUE A multidisciplinary approach highlights discipline specific distinctions in stroke rehabilitation among occupation and physical therapists physicians and speech language pathologists Review questions in each chapter help readers assess their understanding of rehabilitation concepts Key terms and chapter objectives at the beginning of each chapter help readers study more efficiently Three new chapters broaden your understanding of stroke intervention in the areas of Using Technology to Improve Limb Function Managing Speech and Language Deficits after Stroke and Parenting after Stroke Learning activities and interactive references on a companion Evolve Resources website help you review textbook content and locate additional information

Stroke Rehabilitation Richard Wilson, Preeti Raghavan, 2018-09-12 Practical and concise Stroke Rehabilitation provides everyday clinical guidance on current methods techniques evidence and controversies in this important area This focused resource by Drs Richard Wilson and Preeti Raghavan consolidates today's available information in an easy to navigate format for today's practicing and trainee physiatrists as well as other members of the rehabilitation team Covers the complete spectrum of stroke rehabilitation from aphasia to limb impairment to pain syndromes to facilitate the best outcomes and highest quality of life for your patients Discusses prevention predictors of

recovery medication management depression and psychological issues and return to work and driving Includes coverage of robotic technology brain stimulation community based rehabilitation and children and stroke **Stroke Rehabilitation - E-Book** Glen Gillen, 2010-10-25 Three new chapters broaden your understanding of stroke intervention in the areas of Using Technology to Improve Limb Function Managing Speech and Language Deficits after Stroke and Parenting after Stroke Learning activities and interactive references on a companion Evolve Resources website help you review textbook content and locate additional information
