Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Toccock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to

guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory

The Process and Structure of Crime Robert F. Meier, Leslie W. Kennedy, Vincent F. Sacco, 2018-04-24

Criminology has developed strong methodological tools over the past decades establishing itself as a competitive sophisticated and independent social science Perhaps because of its emphasis on matters of design methodology and quantitative analysis criminology has had few significant advances in theory Advances in Criminological Theory is the first series exclusively dedicated to the dissemination of original work on criminological theory The Process and Structure of Crime the ninth volume in this landmark series is a thorough overview of the conceptual and empirical issues raised by the adoption of a criminal event perspective which takes into account the multifaceted character of human behavior This book is divided into three sections conceptual bases of criminal events the criminal event perspective itself and responses to criminal events Contributors analyze and explore a wide range of topics including how interpersonal routines are structured through past experience the influence of social context on interpersonal routines criminal opportunity and its impact on criminal events the significance of neighborhood context the effect of victimization and fear how problem oriented policing efforts need to be informed by and reflect the problems of repeat offenders repeat victims and hot spots of crime and finally how changes in the physical environment constrain or limit criminal opportunities This fascinating work will be beneficial to criminologists sociologists and scholars of legal studies Contributors to this volume include Leslie W Kennedy Erin Gibbs Van

Brunschot Robert F Meier Mark Warr Christopher Birkbeck Luis Gerardo Gabaldon Kriss A Drass Terance D Miethe Julie Horney Jeffrey Fagan Deanna L Wilkinson Robert J Buskirk Jr Vincent F Sacco Ross Macmillan John E Eck Paul J Brantingham and Pat Brantingham Developmental Theories of Crime and Delinquency Terence Thornberry, 2018-02-06 In Developmental Theories of Crime and Delinquency Terence P Thornberry and his contributors show that criminal behavior is not a static human attribute but ebbs and flows over the life course of the individual Criminal behavior tends to follow a distinct psychological pattern It is relatively uncommon during childhood is initiated by most offenders during adolescence flourishes during late adolescence and early adulthood and usually diminishes or disappears by the mid twenties This pattern is not characteristic of all people some never commit crimes and others become career criminals but it is a general description of the developmental pattern of criminal offenders This pattern has profound implications for theories of crime and delinquency Not only does it explain initiation into and maintenance of and desistance from involvement in crime it offers insight into why crime flourishes during adolescence Traditional theories of crime and delinquency have often failed to distinguish among different phases of criminal careers They tend to ignore developmental changes that occur across a person's life course changes that coincide with and can explain the causes and patterns of criminal behavior This paperback edition of the seventh volume of the distinguished series Advances in Criminological Theory moves us from static identifications of the criminal by presenting a broad range of developmental explanations of crime Each contributor articulates a developmental or life course perspective in explaining how people become involved in delinquency and crime Each covers a wide range of theoretical territory and reveals how a developmental perspective enhances the explanatory power of traditional theories of crime and delinquency This volume is an invaluable tool for criminologists sociologists psychologists and other professionals seeking to teach how crime and violence can be understood in our culture
