Structural Change In A Developing Economy Colombias Problems And Prospects:

Structural Change in a Developing Economy Richard R. Nelson, T. Paul Schultz, Robert L. Slighton, 2015-03-08 This book deals with specific problems in Colombia as a means of exploring interrelated theoretical themes in the development process Demographic and political as well as specifically economic variables are given consideration in the authors analysis of the constraints on the growth of Colombia's modern sector Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Winners and Losers in Colombia's Economic Growth of the 1970s Miguel Urrutia, 1985 Examines through the use of a wide array of statistical data how Colombia's economic growth during the decade of the 1970s affected the income of its workers Political Economy and Illegal Drugs in Colombia Francisco E. Thoumi, 1995 Trade and Employment in Developing Countries, Volume 2 Anne O. Krueger, 2008-04-15 Factor Supply and Substitution the second in a three volume study entitled Trade and Employment in Developing Countries extends the analysis of trade regimes and employment both in depth for single countries and through cross country analyses It provides important new evidence of the effects of different trade policies and of the effects of the various factors that make up these policies exchange rates wages social insurance and other taxes credit prices and so on All six studies reflect a carefully coordinated research strategy that has been carried out by a first rate team The researchers combine technical expertise with specialized knowledge of the individual countries

Legal Roles in Colombia Dennis O. Lynch, 1981 **Coffee in Colombia, 1850-1970** Marco Palacios, 2002-07-25 This is the first English language history of Colombia as a coffee producer Work, Wages, and Welfare in a Developing Metropolis Rakesh Mohan, 1986 Examining five key urban sectors of Bogota Columbia housing transport employment location labor markets and public finance this book provides a well written and concise summary of one of the largest research projects undertaken on a major city in a developing country *The Politics of Clientelism* John Martz, 2017-12-02 In Latin America the state is the prime regulator coordinator and pace setter of the entire national system the apex of the pyramid from which patronage wealth power and programs flow The state bears responsibility for the realization of civic needs providing goods and services to each citizen Doing so requires the exercise and maintenance of social and political control It is John Martz's contention that clientelism underlines the fundamental character of Latin American social and political life As the modernizing bureaucratic state has developed in Latin America there has been a concurrent shifting away from clientelistic relationships Yet in one form or another political clientelism still remains central Clientelism occurs when large numbers of low status individuals such as those in the slums of rural and underdeveloped areas are protected by a powerful

patron who defends their interests in return for deference or material reward In Colombia the rural patron has become a member of the higher clientelistic system as well he is dependent on a patron who operates at the national level This enables urban elites to mobilize low status clients for such acts as mass demonstrations of political loyalty to the regime Thus traditional clientelism has been modified through the process of modernization Part One of The Politics of Clientelism examines Colombian politics focusing on the incarnation and traditional forms of clientelism Part Two explores the policies of Colombian governance from the administrations of Lleras Camargo through Julio Cesar Turbay Ayala Part Three discusses the modernization and restructuring of Colombia in recent decades under Belisario Betancur Virgilio Barco and Cesar Gaviria As the modernizing bureaucratic state has unfolded there has been a similar shift in many clientelistic relationships Martz argues that whether corporate clientelism remains or more democratic organization develops

Trade and Employment in Developing Countries, Volume 3 Anne O. Krueger, 2007-12-01 The NBER project on alternative trade strategies and employment analyzed the extent to which employment and income distribution are affected by the choice of trade strategies and by the interaction of trade policies with domestic policies and market distortions This book the third and final volume to come from that project brings together the theory underlying the trade strategies employment relation and the empirical evidence emanating from the project

Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2015-10-27 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm Contributors Rawi Abdelal Harvard Business School Jacqueline Best University of Ottawa Mark Blyth Brown University Mlada Bukovansky Smith College Jeffrey M Chwieroth London School of Economics Francesco Duina Bates College Charlotte Epstein University of Sydney Yoshiko M Herrera University of Wisconsin Madison Paul Langley Northumbria University Craig Parsons University of Oregon Catherine Weaver University of Texas at Austin Wesley W Widmaier Saint Joseph s University Cornelia
