Structure Sheaves Over A Noncommutative Ring:

Structure Sheaves Over a Noncommutative Ring Jonathan S. Golan, 1980 **Localization and Sheaves** Jara Pascual, Conchi Vidal, A Verschoren, 1995-11-30 This book completely solves the problem of representing rings and modules over them which are locally noetherian over subsets of their prime spectrum by structure sheaves over this subset In order to realise this one has to develop the necessary localization theory as well as to study local equivalents of familiar concepts like the Artin Rees property Ore sets and the second layer condition The first part of the book is introductory and self contained and might serve as a starting course at graduate level on localization theory within Grothendieck categories The second part is more specialised and provides the basic machinery needed to effectively these structure sheaves as well as to study their functorial behaviour In this way the book should be viewed as a first introduction to what should be called relative noncommutative algebraic geometry Linear Systems over Commutative Rings James W. Brewer, John W. Bunce, Fred S. Van Vleck, 1986-04-22 **Virtual Topology and Functor Geometry** Fred Van Oystaeyen, 2007-11-15 Intrinsically noncommutative spaces today are considered from the perspective of several branches of modern physics including quantum gravity string theory and statistical physics From this point of view it is ideal to devise a concept of space and its geometry that is fundamentally noncommutative Providing a clear introduction to noncommutat Differential Equations with Applications in Biology, Physics, and Engineering Jerome A.
