

## HOW TEACHER PRACTICES IMPACT STUDENT MINDSETS AND ACHIEVEMENT

The role of the teacher impacts a great diversity of processes and aspects related to educational improvement, one of the most important is undoubtedly student learning, they are also responsible for "planning classes, developing and implementing teaching strategies and research educational"; therefore, teaching practice requires special attention to achieve the stated objectives. Currently, teaching is one of the professions most affected by stress and anxiety, derived from the growing workload and the diversity of technical and emotional skills that need to be developed to solve daily situations and the constant changes that the profession demands. . The implementation of changes in education, despite being oriented towards improving educational quality, generates reactions in teachers and administrators that are not always positive; This is due to the personal challenge that this implies of acquiring new abilities and skills to be able to successfully carry out the new assignments. In this sense, it is argued that the adoption of the competency-based approach directly affects teaching practice due to the changes that it entails in the pedagogical and didactic context.

The link between teacher and student is key to promoting the development of learning of each of the students. Teachers, for their part, must assume the responsibility that this connection implies and act as a reference in the lives of students.

The influence exerted by the teacher on the current education of the students is reflected in their achievements and academic behaviors. According to the study "The teacher-student relationships affect the well-being of students at school?", carried out by O'Hara, the positive and efficient relationships of these students who maintain links with teachers are highly associated with good performance in subjects such as mathematics.

The motivational figure reflected by the teacher promotes the students' cognitive potential. The teaching staff is a fundamental pillar in the development of student learning, that is, the teachers are the guides of their reasoning and the creators
