edition he revisits not only his own research but also that of others from the 1990s and early 21st century He then considers how a discourse of folkloric authenticity emerged in the closing years of the 19th century and how a worrying nationalistic immanence came to surround folk music and dance during the inter war years Brocken also proposes that the media records radio and TV in post WWII folk revivalism can offer us important insights into how self directed learning of the folk guitar emerged Brocken moves on to consider the business structures of the contemporary folk scene and how relationships are formed between contemporary folk business and the digital and social media spheres In his penultimate chapter he discusses the masculinisation of folk traditions and asks important questions about how our folk traditions are carried and are authorised In the final chapter he also considers the rise of an exciting new folk live music built environment
