Smith,2008-04-15 This pioneering volume uses modern statistical and simulation techniques to explain the process of wealth transmission and the persistent problem of the unequal distribution of wealth These papers reflect a shift from the traditional cross sectional measurement to an intertemporal focus by attempting to model mathematically the actual process by which wealth is acquired and transmitted There are many questions to be answered What are the factors influencing saving What is the role of mating What decides ownership between spouses How are rare assets distributed by divorce What are the patterns of behavior in making gifts and bequests And what is the effect of the relative ages of the persons involved **Michigan Wilderness**
