Chinese Social Networks in an Age of Digitalization

Anson Au,2023-12-01 Chinese Social Networks in an Age of Digitalization investigates the impact of digital media on the traditional Chinese model of social interaction trust building and social capital known as guanxi Guanxi is a system of cultural and psychological rules of networking that orders every interaction in China from the labor market to politics to business and even law It is the lifeblood of the nation and nearly just as old But how has guanxi kept pace with the modern rapids of digitalization This book is the first to examine how the rise of social networking sites is transforming guanxi in everyday networking in China home to the largest population of users worldwide and nearly universal adoption in the nation This monograph argues that digitalization is making guanxi liquid that social and geographical boundaries are being melted away and with it people are experiencing a newfound liberation in how they network trust and feel toward others Au asserts that Chinese modernity itself is transforming into what it calls a digital agora a new intermediary space between the public and private spheres that balances obligations to both realms The book offers researchers and students a window into how digitalization is changing how people in guanxi fundamentally think about who to trust how to interact and compose themselves and what it takes to socially survive in a rapidly advancing age of digitalization

Speaking Private Authority Roberto J. Flores,2020-05-26 Speaking Private Authority The Construction of Sustainability in Forests and Fisheries expands upon current understandings of the emergent global phenomenon that is private authority As private

authority is becoming increasingly important in the conduct of global governance broadening our collective understanding of it will prove beneficial Roberto J Flores argues that private actors are not simply outgrowths of existent social structures or material conditions rather they are purposive agents strategically pursuing an agenda Therefore explaining private authority requires an examination of the constitutive elements that underlie this social phenomenon to which the author applies an analytical framework that combines social network theory with discourse analysis The author applies these tools to two cases taken from the environmental sector forests and fisheries and finds that as environmental politics takes on an increasingly networked character the actors that are best able to generate and wield private authority are those that strategically place themselves in between networks through the construction of discursive nodal points around which competing actors are forced to converge at the level of identity The case studies specifically look at how particular actors leveraged construction of the sustainable development concept in order to strategically place themselves in advantageous positions for exercising private authority
