EBOOK: Decentralization in Health Care: Strategies and Outcomes Richard Saltman, Ana Rico, Wienke

Boerma, 2004-09-16 What is the best way to structure primary care services How can coordination between primary care and other parts of health care systems be improved How should new technologies be integrated into primary care There is considerable agreement among national policy makers across Europe that in principle primary care should be the linchpin of a well designed health care system This agreement however does not carry over into the organizational mechanisms best suited to pursuing or achieving this common objective Across western central and eastern Europe primary care is delivered through a wide range of institutional financial professional and clinical configurations This book is a study of the reforms of primary care in Europe as well as their impacts on the broader coordination mechanisms within European health care systems It also provides suggestions for effective strategies for future improvement in health care system reform Primary Care in the Driver's Seat is key reading for students studying health policy health economics public policy and management as well as health managers and policy makers Contributors Richard Baker University of Leicester Sven Eric Bergman Bergman and Dahlbeck AB Stockholm Sweden Wienke Boerma Netherlands Institute of Health Services Research NIVEL in Utrecht Netherlands Mats Brommels University of Helsinki and Karolinska Institute in Stockholm Sweden Michael Calnan University of Bristol Diana Delnoij Netherlands Institute of Health Services Research NIVEL in Utrecht Netherlands Anna Dixon London School of Economics and Political Science Carl Ardy Dubois University of Montreal Canada Joan Gen Badia Catalan Institute of Health in Barcelona Spain Bernhard Gibis National Association of Statutory Health Insurance Physicians KBV Berlin Germany Stefan Gre Institute of Health Care Management of the University of Duisburg Essen in Essen Germany Peter Groenewegen Netherlands Institute of Health Services Research NIVEL and Utrecht University in Utrecht Netherlands Jan Heyrman Catholic University Leuven KULeuven in Leuven Belgium Jack Hutten Ministry of Health Welfare and Sports The Hague Netherlands Michael Kidd University of Sydney Australia Morten Kvist Laitila Pyhäranta Health Centre in Laitila Finland Miranda Laurant Centre for Quality of Care Research of the Universities of Nijmegen and Maastricht in Nijmegen Netherlands Margus Lember University of Tartu in Tartu Estonia Martin Marshall University of Manchester Alison McCallum National Research and Development Centre for Welfare and Health STAKES in Helsinki Finland and Karolinska Institute in Stockholm Sweden Toomas Palu Europe and Central Asia Development Department of the World Bank in Washington DC USA Ana Rico University of Oslo Norway Ray Robinson London School of Economics and Political Science Valentin Rusovich Department of General Practice of the Belarussian Medical Academy for Continuous Medical Education BelMAPO Department of General Practice in Minsk Belarus Richard B Saltman Emory University Atlanta USA Anthony Scott University of Aberdeen Rod Sheaff Manchester University Igor Svab University of Ljubljana Slovenia Bonnie Sibbald University of Manchester Hrvoje Tiljak Andrijač Štampar School of Public Health Zagreb Croatia Michel Wensing Centre for Quality of Care

Research of the Universities of Nijmegen and Maastricht in Nijmegen Netherlands Social Health Insurance Systems In Western Europe Saltman, Richard, Rico, Ana, Boerma, Wienke, 2004-09-01 This title explores the nature of the pressures social health insurance systems confront to be more efficient more effective and more responsive EU Health Systems and Distributive Justice Danielle Da Costa Leite Borges, 2016-07-01 EU Health Systems and Distributive Justice uses theories of distributive justice to examine tensions created by the application of the Internal Market rules to the provision of health care services within the European Union Using the concepts and principles embedded in the theories of egalitarianism and libertarianism this book analyses the impact of the Internal Market rules on common values and principles shared by European health systems such as universality accessibility equity and solidarity This analysis is conducted using the specific issue of cross border health care This book makes innovative contributions to the study of the relationship between EU health systems and the Internal Market it encompasses the analysis of all principles recognised by EU institutions as guiding principles of European health systems it integrates human rights law and practice into the discussion of the EU Court of Justice s approach to patient mobility cases and it assesses the potential impact of the Internal Market over EU health systems through the lens of distributive justice looking at the underlying principles of these systems that are mostly concerned with social justice Ultimately this is not a book on EU law and health care but it is a book on distributive justice health care and the principles and policies guiding European health systems EBOOK: Purchasing to Improve Health Systems Performance Josep Figueras, Ray Robinson, Elke Jakubowski, 2005-03-16 Purchasing is championed as key to improving health systems performance However despite the central role the purchasing function plays in many health system reforms there is very little evidence about its development or its real impact on societal objectives This book addresses this gap and provides A comprehensive account of the theory and practice of purchasing for health services across Europe An up to date analysis of the evidence on different approaches to purchasing Support for policy makers and practitioners as they formulate purchasing strategies so that they can increase effectiveness and improve performance in their own national context An assessment of the intersecting roles of citizens the government and the providers Written by leading health policy analysts this book is essential reading for health policy makers planners and managers as well as researchers and students in the field of health studies Contributors Toni Ashton Philip Berman Michael Borowitz Helmut Brand Reinhard Busse Andrea Donatini Martin Dlouhy Antonio Duran Tam s Evetovits Andr P van den Exter Josep Figueras Nick Freemantle Julian Forder Peter Ga l Chris Ham Brian Hardy Petr Hava David Hunter Danguole Jankauskiene Maris Jesse Ninel Kadyrova Joe Kutzin John Langenbrunner Donald W Light Hans Maarse Nicholas Mays Martin McKee Eva Orosz John vretveit Dominique Polton Alexander S Preker Thomas A Rathwell Sabine Richard Ray Robinson Andrei Rys Constantino Sakellarides Sergey Shishkin Peter C Smith Markus Schneider Francesco Taroni Marcial Velasco Garrido Miriam Wiley *Health Systems in Low- and Middle-Income Countries* Richard D. Smith, Kara Hanson, 2012 Outlines the key aspects issues concerning health systems of

low middle income countries recognising the current global context within which these systems operate the dynamics of this context It brings together a set of renowned authors to tackle the issues that face population health health care in the twenty first century

The Transformation of the Social Right to Healthcare Katharina Böhm, 2016-06-17 This pathbreaking book investigates welfare state change in the area of health care a field widely neglected by comparative welfare state research While some work on health care expenditure exists health care rights have not been systematically studied since social rights have exclusively focused on entitlement to cash benefits Addressing this research gap Böhm analyses in what way the social right to health care has been modified in the course of general welfare state transformation since the late 1970s Taking England and Germany as examples she assesses how health care reforms conducted under the conditions of constrained budgets demographic ageing and rapid medical progress have altered access to and generosity of public health care systems over the past 35 years The book's findings significantly increase our understanding of social rights and reveals fundamental differences of approach while Germany provides absolute and enforceable rights to health care for each entitled individual English social health care rights are directed towards the population as a whole and contingent upon the availability of resources i.e. they are not absolute and not enforceable This distinction between individual and collective social rights will be an important contribution to the theory of social rights given its applicability to other types of social rights and its usefulness in tracing changes in social rights over time

Trends in EU Health Care Systems Winfried de Gooijer, 2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in *Trends in EU Health Care Systems* De Gooijer's dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe's health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent's changing politics Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer's ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a

comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves Gerard Vincent President International Hospital Federation

Health Policy And European Union Enlargement McKee, Martin, MacLehose, Laura, Nolte, Ellen, 2004-04-01 What are the implications of the different levels of health in an enlarged EU Will free movement of goods services and people within an enlarged EU be good for health and health care What have we learned from past enlargements European national policy makers broadly agree on the core objectives that their health care system should pursue The list is straightforward universal access for all citizens effective care for better health outcomes efficient use of resources and high quality services responsive to patient's concerns It is a formula that resonates across the political spectrum and which in various sometimes inventive configurations has played a role in most recent European national election campaigns While there may be consensus on the broader issues expectations differ between EU countries and with the enlargement of 2004 matters become more complex This book seeks firstly to assess the impact of the enlargement process and then to analyse the challenges that lie ahead in the field of health and health policy Written by leading health policy analysts the book investigates a host of areas including Health care investment International recruitment of nurses and doctors Health and safety Communicable disease control European pharmaceutical policy Health Policy and European Union Enlargement will be of interest to students of health policy economics public policy and management as well as health managers and policy makers Contributors Tit Albrecht Roza Adany Ivana Bozicevic James Buchan Richard Coker Evgenia Delcheva Carl Ardy Dubois Anna B Gilmore Antero Heloma Rainer Hess Elke Jakubowski Nicholas Jennett Panos Kanavos Manuel Lobato Karen Lock Laura MacLehose Martin McKee Sally Nicholas Ellen Nolte Stjepan Oreskovic Esa Osterberg Anne Marie Rafferty Magdalene Rosenmiller Alison Wright Reid Monika Zajac Witold Zatonski

Borders across Healthcare Nina Sahraoui, 2020-06-11 Examining which actors determine undocumented migrants access to healthcare on the ground this

volume looks at what happens in the daily interactions between administrative personnel healthcare professionals and migrant patients in healthcare institutions across Europe Borders across Healthcare explores contemporary moral economies of the healthcare migration nexus The volume documents the many ways in which borders come to disrupt healthcare settings and illuminates how judgements of a health related deservingness become increasingly important producing hierarchies that undermine a universal right to healthcare

Expanding Welfare in an Age of Austerity Anthony Kevins, 2025-10-01 In recent decades and particularly since the financial crisis continental Europe has seen an increasing gap between those workers who have well protected good paying jobs with strong benefits and those who work lower quality nonstandard jobs or who have no regular work at all This situation would seem to call for increased spending on the social safety net yet governments throughout the region have instead been turning to austerity In the face of that reality the options for helping disadvantaged workers are to extend coverage through re allocating the benefits given to higher level workers maintain the benefits of the well off as the number of outsiders continues to grow or simply ignore the problem This book asks why different nations have taken different tacks in handling or not handling this problem

Regulating Pharmaceuticals In Europe: Striving For Efficiency, Equity And Quality Mossialos, Elias, Mrazek, Monique, Walley, Tom, 2004-06-01 This thoughtful and comprehensive book represents the best work I have seen on the current situation concerning medication policies in the EU It is not just that this is a very up to date compendium of facts and data across a wide variety of domains that impact on pharmaceutical regulation The book is also strong on analysis of those facts as well Jerry Avorn Harvard Medical School This book offers a comprehensive examination of approaches to manage pharmaceutical expenditures in Europe It is a must read for those who seek to understand and navigate the changing regulatory environment for medicines in the European Union Bernie O'Brien McMaster University Canada The rising cost of pharmaceutical expenditures in many European countries is of concern to governments required to make effective use of health care budgets Taking a broad perspective that encompasses institutional political and supranational aspects of pharmaceutical regulation this book examines approaches used to manage pharmaceutical expenditure across Europe and what impact these strategies have had on efficiency quality equity and cost of pharmaceutical care

Two Centuries of Solidarity K.P. Comanje, R.H.M. Hendriks, K.F.E. Veraghtert, B.E.M. Widdershoven, 2025-10-01 Today health insurance is a key

component in the system of social security in most European Union countries. In many of these countries, modern health insurance funds and healthcare insurers play an essential role in implementing the public health insurance system. Many of these health insurance funds have a long and fascinating history of which clear traces can be seen today in the organisation and structure of health insurance as well as health insurance funds and insurers. In Two centuries of solidarity the authors compare the systems of health insurance health insurance funds and healthcare insurers in Germany, Belgium and the Netherlands. Given the similar political, economic and social development that these countries have undergone in the past 60 years and the availability of a qualitatively high level of health care, one might expect a high degree of similarity between these countries' healthcare insurance systems. However, the dissimilarities are surprising. In fact, these differences are currently becoming ever more apparent between systems in general and the structure and operation of the health insurance funds and health care insurers in particular. The differences include the compulsory nature of insurance, the extent of coverage, premiums, entrepreneurship, competition and the degree of private insurance. Many of these national singularities can be understood and explained only by considering the historical background of the health insurance systems, the insurers and their evolution over the past two centuries. This study adopts an institutional and political perspective towards a further understanding of the development of health insurance and of how this ultimately determined the specific nature of the healthcare insurers and funds and the way they currently operate in Germany, Belgium and the Netherlands.

The European Culture Area Alexander B. Murphy, Terry G. Jordan-Bychkov, Bella Bychkova Jordan, 2008-08-28 A sixth edition of this book is now available. Now in a fully updated fifth edition, this premier text has been thoroughly revised to reflect the sweeping changes the past decade has brought to Europe. Long hailed for its creativity and intellectual depth, the book is now further enriched by the expertise of a new lead author, noted geographer Alexander B. Murphy. In this edition, he has focused on Europe's role in the wider world and incorporated new research and teaching approaches in regional geography. The topical organization, including environment, ethnicity, religion, language, demography, politics, industry and urban and rural life, offers students a holistic understanding of the diverse European culture area.
