Social Meanings Of Money Paychecks Pin Money Poor Relief And Other Currencies:

The Social Meaning of Money Viviana A. Rotman Zelizer, 1997 On the meaning of money **Talking Prices** Olav Velthuis, 2007-08-19 How do dealers price contemporary art in a world where objective criteria seem absent Talking Prices is the first book to examine this question from a sociological perspective On the basis of a wide range of qualitative and quantitative data including interviews with art dealers in New York and Amsterdam Olav Velthuis shows how contemporary art galleries juggle the contradictory logics of art and economics In doing so they rely on a highly ritualized business repertoire For instance a sharp distinction between a gallery's museumlike front space and its businesslike back space safeguards the separation of art from commerce Velthuis shows that prices far from being abstract numbers convey rich meanings to trading partners that extend well beyond the works of art A high price may indicate not only the quality of a work but also the identity of collectors who bought it before the artist's reputation was established Such meanings are far from unequivocal For some a high price may be a symbol of status for others it is a symbol of fraud Whereas sociological thought has long viewed prices as reducing qualities to quantities this pathbreaking and engagingly written book reveals the rich world behind these numerical values Art dealers distinguish different types of prices and attach moral significance to them Thus the price mechanism constitutes a symbolic system akin to language **The Development of Consumer Credit in Global Perspective** J. Logemann, 2012-07-16 This volume brings together historians economists political scientists and anthropologists to present a global perspective on the new forms of lending and borrowing that have become a key feature of twentieth century mass consumer societies emphasizing comparative and transnational historical perspectives **Gender and Power in Eastern Europe** Katharina Blum, Gertrud Pickhan, Justyna Stypinska, Agnieszka Wiercholska, 2020-10-31 This book explores the contradictory development of gender roles in Central and Eastern Europe including Russia In light of the social changes that followed the collapse of communism and the rise of new conservatism in Eastern Europe it studies new forms of gender relationships and reassesses the status quo of female empowerment Moreover leading scholars in gender studies discuss how right wing populism and conservative movements have affected sociopolitical discourses and concepts related to gender roles rights and attitudes and how Western feminism in the 1990s may have contributed to this conservative turn Mainly focusing on power constellations and gender the book is divided into four parts the first explores the history of and recent trends in feminist movements in Eastern Europe while the second highlights the dynamics and conflicts that gained momentum after neoconservative parties gained political power in post socialist countries In turn the third part discusses new empowerment strategies and changes in gender relationships The final part illustrates the identities roles and concepts of masculinity created in the sociocultural and political context of Eastern Europe **Working Hard and Making Do** Margaret K. Nelson, Joan Smith, 1999-05-24 The economic recovery of the 1990s brought with it a surge of new jobs but the prospects for most working Americans improved little Family income rose only slightly and the period

witnessed a significant degradation of the quality of work as well as in what people could expect from their waged employment In this book Margaret K Nelson and Joan Smith take a look inside the households of working class Americans to consider how they are coping with large scale structural changes in the economy specifically how the downgrading of jobs has affected survival strategies gender dynamics and political attitudes Drawing on both randomly distributed telephone surveys and in depth interviews Nelson and Smith explore the differences in the survival strategies of two groups of working class households in a rural county those in which at least one family member has been able to hold on to good work a year round full time job that carries benefits and those in which nobody has been able to secure or retain steady employment They find that households with good jobs are able to effectively use all of their labor power they rely on two workers they engage in on the side businesses and they barter with friends and neighbors In contrast those living in families without at least one good job find themselves considerably less capable of deploying a complex multi faceted survival strategy The authors further demonstrate that this difference between the two sets of households is accompanied by differences in the gender division of labor within the household and the manner in which individuals make sense of and respond to their employment

central to the economic functioning of the societies that used them In several of these cases it argues that shells were used in ways that meet all the standard definitions of modern money By examining the wide range of uses of shell money in ancient economic systems around the world this Element explores the diversity of forms that money has taken throughout human history This title is also available as Open Access on Cambridge Core [Speculative Research](#) Alex Wilkie, Martin Savransky, Marsha Rosengarten, 2017-02-17 Is another future possible So called late modernity is marked by the escalating rise in and proliferation of uncertainties and unforeseen events brought about by the interplay between and patterning of social natural techno scientific and political economic developments The future has indeed become problematic The question of how heterogeneous actors engage futures what intellectual and practical strategies they put into play and what the implications of such strategies are have become key concerns of recent social and cultural research addressing a diverse range of fields of practice and experience Exploring questions of speculation possibilities and futures in contemporary societies Speculative Research responds to the pressing need to not only critically account for the role of calculative logics and rationalities in managing societal futures but to develop alternative approaches and sensibilities that take futures seriously as possibilities and that demand new habits and practices of attention invention and experimentation **The Currency of Truth** Emily H. C. Chua, 2023-04-03 China's news sector is a place where newsmakers advertising executives company bosses and Party officials engage one another in contingent and evolving arrangements that run from cooperation and collaboration to manipulation and betrayal Drawing on long term ethnographic fieldwork with journalists editors and executives at a newspaper in Guangzhou The Currency of Truth brings its readers into the lives of the people who write publish and profit from news in this milieu The book shows that far from working as mere cogs in a Party propaganda machine these individuals are immersed in fluidly shifting networks of formal and informal relationships which they carefully navigate to pursue diverse goals In The Currency of Truth Emily H C Chua argues that news in China works less as a medium of mass communication than as a kind of currency as industry players make and use news articles to create agreements build connections and protect and advance their positions against one another Looking at the ethical and professional principles that well intentioned and civically minded journalists strive to uphold and the challenges and doubts that they grapple with in the process Chua brings her findings into conversation around post truth news and the crisis of professional journalism in the West The book encourages readers to rethink contemporary news arguing that rather than setting out from the assumption that news works either to inform or deceive its publics we should explore the post public social and political imaginaries emerging among today's newsmakers and remaking the terms of their practice **Situating Child Consumption** Anna Sparrman, Bengt Sandin, Johanna Sjöberg, 2015-01-01 Providing extensive examples of the conditions of children's everyday consumption as well as how children themselves understand issues of work money scarcity and consumer products this book challenges the prevailing theories of consumption and opens up new ways of thinking about children Arguing that

consumption simultaneously reflects on the changing social role of children family relations market interaction and state regulations this account marries consumer studies with perspectives that emanate from the disciplines of childhood sociology and the history of childhood With contributions from novice and established researchers it generates consumer values no longer based on the idea of the naive or competent child

End of Money David Wolman, 2025-05-01 For ages money has meant little metal disks and rectangular slips of paper Yet the usefulness of physical money to say nothing of its value is coming under fire as never before Intrigued by the distinct possibility that cash will soon disappear author and Wired contributing editor David Wolman sets out to investigate the future of money and how it will affect your wallet Wolman begins his journey by deciding to shun cash for an entire year a surprisingly successful experiment with a couple of notable exceptions He then ventures forth to find people and technologies that illuminate the road ahead In Honolulu he drinks Mai Tais with Bernard von NotHaus a convicted counterfeiter and alternative currency evangelist whom government prosecutors have labeled a domestic terrorist In Tokyo he sneaks a peek at the latest anti counterfeiting wizardry while puzzling over the fact that banknote forgers depend on society's addiction to cash In a downtrodden Oregon town he mingles with obsessive coin collectors the people who are supposed to love cash the most yet don't And in rural Georgia he examines why some people feel the end of cash is Armageddon's warm up act After stops at the Digital Money Forum in London and Iceland's central bank Wolman flies to Delhi where he sees first hand how cash penalizes the poor more than anyone and how mobile technologies promise to change that Told with verve and wit *The End of Money* explores an aspect of our daily lives so fundamental that we rarely stop to think about it You'll never look at a dollar bill the same again

Against the Profit Motive Nicholas R. Parrillo, 2013-10-22 In America today a public official's lawful income consists of a salary But until a century ago the law frequently authorized officials to make money on a profit seeking basis Prosecutors won a fee for each

defendant convicted Tax collectors received a cut of each evasion uncovered Naval officers took a reward for each ship sunk The list goes on This book is the first to document American government s for profit past to discover how profit seeking defined officials relationship to the citizenry and to explain how lawmakers by banishing the profit motive in favor of the salary transformed that relationship forever

Planetary Improvement Jesse Goldstein, 2018-03-16 An examination of clean technology entrepreneurship finds that green capitalism is more capitalist than green Entrepreneurs and investors in the green economy have encouraged a vision of addressing climate change with new technologies In Planetary Improvement Jesse Goldstein examines the cleantech entrepreneurial community in order to understand the limitations of environmental transformation within a capitalist system Reporting on a series of investment pitches by cleantech entrepreneurs in New York City Goldstein describes investor friendly visions of incremental improvements to the industrial status quo that are hardly transformational He explores a new green spirit of capitalism a discourse of planetary improvement that aims to save the planet by looking for non disruptive disruptions technologies that deliver solutions without changing much of what causes the underlying problems in the first place Goldstein charts the rise of business environmentalism over the last half of the twentieth century and examines cleantech s unspoken assumptions of continuing cheap and abundant energy Recounting the sometimes conflicting motivations of cleantech entrepreneurs and investors he argues that the cleantech innovation ecosystem and its Schumpeterian dynamic of creative destruction are built around attempts to control creativity by demanding that transformational aspirations give way to short term financial concerns As a result capitalist imperatives capture and stifle visions of sociotechnical possibility and transformation Finally he calls for a green spirit that goes beyond capitalism in which sociotechnical experimentation is able to break free from the narrow bonds and relative privilege of cleantech entrepreneurs and the investors that control their fate
