nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved

First Episodes Stephen R. Waterhouse, 2022-11-21 Originally published in 1991 First Episodes Pupil Careers in the Early Years of School is based on a four year longitudinal study of pupils from two different catchment areas from the first days of their entry to primary school Using qualitative methodologies of depth interviewing and naturalistic observation it attempts to examine the social construction of pupil careers in the dynamics of classroom life Particular attention has been given to the longitudinal and continuing process in the formation of pupils over the first four years of schooling especially in looking at the moment by moment processes of formulation as episode follows episode in the rapid flow of classroom life It is suggested that teachers operate fundamental distinctions between normal and abnormal pupils and in the ongoing processes of classroom life a distinction between the episodic and the trans episodic in their constructions of reality Central to the analysis has been the notions of relativity in the placement of boundaries in interpersonal relations It is suggested that the casting of pupils within the framework of role i.e. Other role is a central process at both episodic and trans episodic levels The book recommends a move away from the more usual notion of rule transgression and its related societal reactions so prominent in the literature on deviance It is suggested that it is the role rather than the rule which is critical to the perception of deviation and the formulation of pupils in early schooling In looking for temporal processes of emergence it is suggested that there is continuing tension between the episodic and the trans episodic in teachers formulation of children It seems the construction of present reality as having continuity or discontinuity
