**Library of Congress Catalogs** Library of Congress, 1983 *Currents of Thought in American Social Psychology* Gary  
Collier, Henry L. Minton, Graham Reynolds, 1991 In this intriguing study two social psychologists and an intellectual historian  
describe the people and intellectual currents which have given rise to the complex discipline of American social psychology  
The authors examine the influence of British evolutionary theory French social theory American pragmatism and the ideas of  
Freud Marx and Lewin on the evolution of social psychological theory and explain how these traditions contributed to later  
developments such as group dynamics cognitive social psychology and symbolic interaction American social psychology  
during this century has shifted back and forth from a focus on individual psychological processes to a concern with the role of  
the broader social context and social interaction This has resulted in the development of several quite distinct social  
psychologies which are all valid rather than mutually exclusive and it should be possible to build a discipline in which all  
aspects of social interaction are considered Students and professionals in social psychology sociology and related areas as

gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the
