Social Science Quotations Robert Merton, 2018-04-27
 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences. Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole. The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable. This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves. Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought; those works with staying power often described as the classical texts. Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed. Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well. This book is useful to social scientists, anthropologists, economists, historians, political scientists, psychiatrists, psychologists, sociologists, and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories. It is particularly useful for graduate students taking courses that examine the history of their discipline. *Robert K. Merton*

Star Sociologists Philipp Korom, 2023-04-21
 This book aims to overcome sociology's preoccupation with individual authors by exploring a larger social phenomenon that occurs in all academic disciplines but has been paid little attention: the prestige elite. Members of this elite attain the highest levels of peer recognition; their books sometimes circulate by the hundreds of thousands and every student has read about them. Based on large citation studies, *Star Sociologists* provides a roster of eminent sociologists, documents the changing elite's composition over time, contrasts the elite's career pathways with those of the Nobel Laureates in economics, gives insights into how scholars rise to or fall from eminence, and empirically probes the gatekeeping power of one of its key proponents. The book explores eminence by contextualising conditions that are outside of the elite and argues that in any discipline that is intellectually as disintegrated as sociology, eminence is to be understood as a nested phenomenon: scholars make it into the elite if their ideas are adopted in very different intellectual fields that share little common ground.

The Words of Others Gary Saul Morson, 2011-06-28
 In this lively gambol through the history of quotations and quotation books, Gary Saul Morson traces our enduring fascination with the words of others. Ranging from the remote past to the present, he explores the formation, development, and significance of quotations while exploring the verbal museums in which they have been collected and displayed: commonplace books, treasuries, and anthologies. In his trademark clear, witty, and provocative style, Morson invites readers to share his delight in the shortest literary genre. The author defines what makes a quote quotable as well as the unexpected differences between quotation and misquotation. He describes how quotations form, transform, and may

eventually become idioms How much of language itself is the residue of former quotations Weaving in hundreds of intriguing quotations common and unusual Morson explores how the words of others constitute essential elements in the formation of a culture and of the self within that culture In so doing he provides a demonstration of that very process captured in the pages of this extraordinary new book

A Transatlantic History of the Social Sciences Christian Fleck, 2011-02-25

From the beginning of the twentieth century scientific and social scientific research has been characterised by intellectual exchange between Europe and the US The establishment of the Third Reich ensured that from the German speaking world at least this became a one way traffic In this book Christian Fleck explores the invention of empirical social research which by 1950 had become the binding norm of international scholarship and he analyses the contribution of German refugee social scientists to its establishment The major names are here from Adorno and Horkheimer to Hirschman and Lazarsfeld but at the heart of the book is a unique collective biography based on original data from more than 800 German speaking social scientists Published in German in 2008 to great acclaim Fleck's important study of the transatlantic enrichment of the social sciences is now available in a revised English language edition

A Historiography of the Modern Social Sciences Roger E. Backhouse, Philippe Fontaine, 2014-09-22

A Historiography of the Modern Social Sciences includes essays on the ways in which the histories of psychology anthropology sociology economics history and political science have been written since the Second World War Bringing together chapters written by the leading historians of each discipline the book establishes significant parallels and contrasts and makes the case for a comparative interdisciplinary historiography This comparative approach helps explain historiographical developments on the basis of factors specific to individual disciplines and the social political and intellectual developments that go beyond individual disciplines All historians including historians of the different social sciences encounter literatures with which they are not familiar This book will provide a broader understanding of the different ways in which the history of the social sciences and by extension intellectual history is written

Reporting of Social Science in the National Media Carol Weiss, Eleanor Singer, 1988-08-04

Policy makers as well as the general public are often unaware of social science research until a story about it appears in the national media Even in official Washington a staffer's report on social research may go unnoticed while a report in the Washington Post receives immediate attention This study takes a systematic and revealing look at social science reporting

How do journalists hear about social science and why do they select certain stories to cover and not others How do journalistic standards for selection compare with social scientists own judgments of merit How do reporters attempt to ensure accuracy and how freely do they introduce their own interpretations of social science findings How satisfied are social scientists with the selection and accuracy of social science news In Part I Carol H Weiss addresses these questions on the basis of personal interviews with social scientists and the journalists who wrote about their work Part II by Eleanor Singer is based on an analysis of media content itself and compares social science reporting over time between 1970 and 1982 and across media newspapers newsmagazines television These two complementary perspectives combine to produce a thorough realistic assessment of the way social science moves out of the academy and into the world of news Annual Report - Social Science Research Council Social Science Research Council (U.S.),1989

Cohen, Ingeborg K. Helling, 2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl's phenomenology Kelsen's pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K. Helling which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students
