McCrank, 2001 Here is an extensive review and bibliographic essay backed by 5 000 citations about developments in information technology since the advent of personal computing and the convergence of the disciplines Its focus is on the access preservation and analysis of historical information primarily in electronic form and the relationships between new methodology and instructional media technique and research trends in library special collections digital libraries electronic and data archives and museums America, History and Life ,1968 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **University of Illinois Studies in the Social Sciences** ,1920 **Choice** ,1968 **Art Bibliographies** ,1973 **The Essence of Teaching Social Studies** James A. Duplass, 2020-09-30 Designed for use in elementary and secondary social studies education courses this book supports the teaching of social studies methods in a range of educational settings By highlighting long standing content and principles of social studies education in a concise and direct way this volume offers the building blocks of a comprehensive course for use as springboards to the effective presentation of professors desired course emphases With sections on foundations subject areas and best practices this text explains the intersection between the modelling role of social studies teachers as democratic citizens social studies fields of study and strategies implemented in the classroom to encourage students critical thinking and values formation Critical Reflexive Research Methodologies ,2023-11-07 While all

oppressions are equal some are more equal than others This statement borrowed from George Orwell's *Animal Farm* and written and marinated to fit within and without our call for ethical research helps us to see how contemporary research processes are singular and fail to account for the complex histories realities and values of marginalized communities Such a failure to account and remember has had massive symbolic and material consequences on marginalized communities illustrated by the number of deaths we continue to witness everyday Those deaths have been sanctioned and authorized by the ways in which we come to know what we know and how that is imprinted in our policies and everyday existence This book looks at knowledge production as a process of giving an account of those losses in ways that help knowledge production to be a mechanism of remembering cognitive and remembering community or bring together solidarity a form of epistemological and ontological demonstration Ethical knowledge production becomes a process of relationship that remembers the histories values and realities of people in ways that are transformative and political Such an expression fails to arrive at an end and rather recognizes knowledge production as endless production of knowledge Such a process goes against neoliberal mechanism of commodifying knowledge for sale in the market This edited collection attempts to engage with current qualitative research methodologies and approaches from a critically and ethically reflexive standpoint This work seeks to unravel colonial practices that continue to hide within qualitative approaches in ways that invite a new reimagining of working within and without qualitative methodologies This edited collection therefore seeks to bring to the fore the lived experiences of the studied to their storied life in ways that are ethically and politically congruent This work therefore seeks to bring forth Foucault's subterranean narratives steeped in contexts and experiences that can critically invert the dominant colonial capitalist state practices in existing research European Economic and Political Survey, 1928 *Research Resources: International relations & recent history; indexes, abstracts & periodicals* John Brown Mason, 1968

Witchcraft, Sorcery, Rumors and Gossip Pamela J. Stewart, Andrew Strathern, 2004 This book combines two classic topics in social anthropology in a new synthesis the study of witchcraft and sorcery and the study of rumors and gossip First it shows how rumor and gossip are invariably important as catalysts for accusations of witchcraft and sorcery Second it demonstrates the role of rumor and gossip in the genesis of social and political violence as in the case of both peasant rebellions and witch hunts Examples supporting the argument are drawn from Africa Europe India Papua New Guinea Sri Lanka and Indonesia **Transformations of Security Studies** Gabi Schlag, Julian Junk, Christopher Daase, 2015-10-30 This volume brings together a group of distinguished scholars to engage in a dialogue on key developments in the study of security The book provides a comprehensive overview of theoretical empirical and methodological developments within security studies whose political and societal importance has grown significantly in recent years By bringing together scholars who hold differing perspectives on security this volume provides insights into a variety of approaches and their newest developments including mainstream as well as heterodox perspectives on security Thus it aims to build bridges of

communication between different camps by initiating a dialogue on the identity and diversity of security studies. It does so in three parts. The first part of the book includes paradigmatic approaches to security that are closely connected to major debates in International Relations such as realism, institutionalism, constructivism, as well as approaches to the culture, ethics of security and critical security studies. The second part places emphasis on the broadening and deepening of the concept of security in recent decades. It discusses key empirical frontiers including the continued centrality of the state, the link between democracy and security, environmental security as well as financial security. The third part of the book presents various methodological approaches to the question of security and peace. It provides an overview of new approaches such as the visual turn, quantifying security and method combinations. This book will be of much interest to students of critical security studies, international relations and research methods.
