as one of the leading figures in social theory and the social sciences During the last decade Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach The twin focal points of his approach are the theory of structuration and the analysis of modernity Giddens s writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the social sciences *Social Theory of Modern Societies* is the first volume to provide a systematic and critical assessment of Giddens s contributions The volume includes eleven critical essays all of which were specially commissioned for this volume by authors who are well known in their own fields Zygmunt Bauman Richard J Bernstein Derek Gregory Nicky Gregson David Held Bob Jessop Linda Murgatroyd Peter Saunders Martin Shaw John B Thompson and Erik Olin Wright In a long concluding chapter Anthony Giddens responds to the criticisms raised by these and other authors clarifying and elaborating his current views The result is a unique and engaging book which gives both a critical evaluation of Giddens s work and a guide to some of the theoretical issues which are at the forefront of the social sciences today It will be of interest to students and academics in sociology politics and geography and to students in the social sciences and humanities generally *Social Theory and Modern Sociology* Anthony

Giddens,2013-04-25 In this book Anthony Giddens addresses a range of issues concerning current developments in social theory relating them to the prospects for sociology in the closing decades of the twentieth century Composed of closely integrated papers all written over the past few years the book includes seven essays not previously published plus two have not appeared in English before In assessing the likely future evolution of sociology in particular and the social sciences in general the author both draws upon ideas established in his more abstract theoretical writings and examines critically competing traditions of thought Those looking for an accessible introduction to Giddens s writing will find in this book a set of clear expositions of his basic ideas By situating these ideas in relation to the critical assessment of the views of others however the author provides new sources of insight into the distinctiveness of his own claims *Fin de Siècle Social Theory*

Jeffrey C. Alexander,1995 In four closely interwoven studies Jeffrey Alexander identifies the central dilemma that provokes contemporary social theory and proposes a new way to resolve it The dream of reason that marked the previous fin de si cle foundered in the face of the cataclysms of the twentieth century when war revolution and totalitarianism came to be seen as themselves products of reason In response there emerged the profound skepticism about rationality that has so starkly defined the present fin de si cle From Wittgenstein through Rorty and postmodernism relativism rejects the very possibility of universal standards while for both positivism and neo Marxists like Bourdieu reductionism claims that ideas simply reflect their social base In a readable and spirited argument Alexander develops the alternative of a neo modernist position that defends reason from within a culturally centered perspective while remaining committed to the goal of explaining not merely interpreting contemporary social life On the basis of a sweeping reinterpretation of postwar society and its intellectuals he suggests that both antimodernist radicalism and postmodernist resignation are now in decline a more democratic less

ethnocentric and more historically contingent universalizing social theory may thus emerge Developing in his first two studies a historical approach to the problem of absent reason Alexander moves via a critique of Richard Rorty to construct his case for present reason Finally focusing on the work of Pierre Bourdieu he provokes the most sustained critical reflection yet on this influential thinker Fin de Siecle Social Theory is a tonic intervention in contemporary debates showing how social and cultural theory can properly take the measure of the extraordinary times in which we live **Introduction to**

Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency

to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity
