Social Ecology Of Religion:

The Social Ecology of Religion Vernon Reynolds, Ralph E. S. Tanner, 1995 What effect does the Islamic attitude toward abortion have upon the family size and growth of Muslim populations How do the Sukuma people of Tanzania react to the birth of an abnormal child and why do their reactions differ so radically from those of Roman Catholics in Pennsylvania Why were one sixth of all brides in English rural parishes between the late sixteenth and early nineteenth centuries pregnant at marriage and what does this tell us about Christian practices during that period No society exists in which religion does not play a significant part in the lives of ordinary people Yet the functions of the world's diverse religions for human beings have never been fully described and analyzed nor has the impact of adherence to those religions on the health and survival of the populations that practice them A completely updated and revised edition of *The Biology of Religion* published in 1983 this extraordinary text reveals how religions in all parts of the world meet the needs of ordinary people and frequently play an important role in helping them to manage their affairs Reynolds and Tanner show that religions have down to earth functions in the control and management of the main events of the human life cycle birth marriage death and the events in between Surveying the beliefs and practices of Christianity Judaism Islam Hinduism Buddhism Shintoism and many others and how these religions concern themselves with major issues such as abortion sex in and outside marriage divorce and sickness the authors demonstrate a world wide concern by religions for these important issues They attribute this concern to the need all human beings have for guidelines to behavior during the most important times of life Supported by a wealth of scientific data and examples and generously illustrated throughout this unique text makes a vital contribution to courses in anthropology and comparative religion

The Social Ecology of Resilience Michael Ungar, 2011-10-08 More than two decades after Michael Rutter 1987 published his summary of protective processes associated with resilience researchers continue to report definitional ambiguity in how to define and operationalize positive development under adversity The problem has been partially the result of a dominant view of resilience as something individuals have rather than as a process that families schools communities and governments facilitate Because resilience is related to the presence of social risk factors there is a need for an ecological interpretation of the construct that acknowledges the importance of people's interactions with their environments The Social Ecology of Resilience provides evidence for this ecological understanding of resilience in ways that help to resolve both definition and measurement problems

The Sutra Yutong, In exploring the essence function and role of religion in human societies we have to confront a complex and multifaceted issue Religion as an enduring cultural phenomenon has evolved in its connotations and denotations over time This profound exploration into religion reveals the secrets behind the enduring vitality of religious practices and the invisible ecological nature of religion itself It presents the power of enlightenment transcending the realms of monks and nuns making us realize that all beings possess Buddha nature and the potential to attain enlightenment Enlightenment is the foundation of faith and a pivotal moment in the course of scientifically disciplined spiritual practice In the vast river of the universe humanity is but a node with an enlightened society

being its ultimate destination Through the right knowledge and insight we ensure the absolute authority of the Sutra approaching the original intent of the Buddha infinitely and materialistically Employing a scientific materialist perspective to understand Buddhism is the essential path to enlightenment and mastery of objective laws The reason religion continues to captivate people lies not only in its provision of spiritual solace but more importantly in fulfilling the pursuit of ultimate meaning Through its unique belief system religion offers believers a way to interpret the world and life often surpassing everyday experiences and logic Moreover religion plays a social function by propagating specific values thereby influencing society and maintaining social order to some extent The essence of religion can be regarded as an objectively existing invisible ecology This view considers religion as a manifestation of a special relationship between humans and nature and the universe representing humanity's attempt to understand and master the world The sacred reality in religion provides people with a spiritual refuge beyond reality enabling them to find strength and hope when facing difficulties and challenges in life Third enlightenment is the essence of Buddha nature it is not confined to monks or nuns This view highlights the importance of self-awakening in Buddhism Every individual has the potential to become enlightened It is not limited to monks or nuns but open to anyone willing and able to follow the correct practices This perspective encourages personal spiritual enhancement and self-improvement through inner cultivation and practice The belief that all beings possess Buddha nature signifies everyone's potential for enlightenment Grounded in a fundamental doctrine of Buddhism it suggests that all living beings inherently possess supreme Buddha nature which can be gradually unveiled by the correct practice removing ignorance and delusion ultimately achieving enlightenment This highlights Buddhism's affirmation of individual potential and the possibility of self-transcendence through practice In summary religion as a complex cultural phenomenon extends far beyond mere superstition or spiritual reliance It influences the development and future of human societies with correct knowledge and insight Religion serves both as an individual's spiritual pursuit and a societal value system Through a deep understanding and study of religion we can better recognize its significant status in human history and culture as well as its positive contributions to individual and societal development This journey of exploration is not only a reflection on religion itself but also an inquiry into human civilization transcending traditional religious boundaries Integrating science and faith and opening a path to enlightenment In this era of challenge and transformation this book offers a guiding light leading us towards a deeper reflection and cognition Illuminating a promising path for humanity's future
