Syllabus Series University of California (System), 1914 *Britain and Joseph Chamberlain* Michael Balfour, 2012-11-15 After all the endeavours that combined to make Britain the first great industrial nation that dominant position was then relinquished Joseph Chamberlain 1836 1914 the driven and self made Birmingham businessman who shifted his energies formidably into politics might have appeared to be one leader well equipped to help Britain stay competitive in the global race for economic growth But as Michael Balfour suggests in this absorbing study Chamberlain s personality and temperament were not suited to the challenge Determined always to have his way animated by the business man s love of getting things done Chamberlain lacked the gift of persuasion and made enemies too well it being his unique achievement to split both major parties in the space of twenty years Had it been possible for one man to arrest Britain s slackening growth then that man Balfour contends was not the erstwhile Radical Joe *Changing Theory* Dilip M Menon, 2022-05-02 This book is an original systematic and radical attempt at decolonizing critical theory Drawing on linguistic concepts from 16 languages from Asia Africa the Arab world and South America the essays in the volume explore the entailments of words while discussing their conceptual implications for the humanities and the social sciences everywhere The essays engage in the work of thinking through words to generate a conceptual vocabulary that will allow for a global conversation on social theory which will be necessarily multilingual With essays by scholars across generations and from a variety of disciplines history anthropology and philosophy to literature and political theory this book will be essential reading for scholars researchers and students of critical theory and the social sciences *The Economic Mind in America* History of Economics Society. Conference, 1998 The Economic mind of America examines the concept of American economic thought reassessment of

pioneering American policy analysts such as Irving Fisher Wesley Mitchell Harold Moulton and Leo Paslovsky as well as the theoretical contributions of Herbert Davenport and Frank Knight Thorstein Veblen s institutional economics and an exploration of the influence of Canadian and European economic thought analysis of contributions of C S Peirce Alvin Johnson and science fiction author Robert A Heinlein American economists interests in in issues from 1886 1995 The Cambridge World History of Slavery: Volume 2, AD 500-AD 1420 Craig Perry, David Eltis, Stanley L. Engerman, David Richardson, 2021-08-12 Medieval slavery has received little attention relative to slavery in ancient Greece and Rome and in the early modern Atlantic world This imbalance in the scholarship has led many to assume that slavery was of minor importance in the Middle Ages In fact the practice of slavery continued unabated across the globe throughout the medieval millennium This volume the final volume in The Cambridge World History of Slavery covers the period between the fall of Rome and the rise of the transatlantic plantation complexes by assembling twenty three original essays written by scholars acknowledged as leaders in their respective fields The volume demonstrates the continual and central presence of slavery in societies worldwide between 500 CE and 1420 CE The essays analyze key concepts in the history of slavery including gender trade empire state formation and diplomacy labor childhood social status and mobility cultural attitudes spectrums of dependency and coercion and life histories of enslaved people **Civilization and the Chinese Body Politic** Yongnian Zheng, 2022-11-22 In this important and hugely ambitious book one of the world s leading political scientists working on China demonstrates how Western views of China are flawed because the long tradition of Western scholarship studying China views China from the Western philosophical and intellectual perspective rather than viewing China on its own terms through the lens of China s own long established and reputable philosophical and intellectual tradition Providing a deep analysis of Western scholarship on China including work from Leibniz to Marx to Weber and then to Wittfogel and a thorough account of the evolution of China s own thinking about governance as expressed in the practices of successive Chinese dynasties the book goes on to examine how the current Chinese body politic fits with and is the natural outcome of China s own long well thought through and well practiced intellectual consideration of what the nature of civilized governance should be By focusing on philosophical and intellectual approaches rather than on theoretical or methodological ones the book shows how the huge and increasing disconnect between non Chinese views of China and Chinese ones has come about

The Cambridge Economic History of Modern Europe: Volume 2, 1870 to the Present Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach The Cambridge Economic History of Modern Europe rethinks Europe's economic history since 1700 as unified and pan European with the material organized by topic rather than by country This second volume tracks Europe's economic history through three major phases since 1870 The first phase was an age of globalization and of European economic and political dominance that lasted until

the First World War The second from 1914 to 1945 was one of war deglobalization and depression and the third was one of growing integration not only within Europe but also between Europe and the global economy Leading authors offer comprehensive and accessible introductions to these patterns of globalization and deglobalization as well as to key themes in modern economic history such as economic growth business cycles sectoral developments and population and living standards

The Politics of Decline Jim Tomlinson, 2014-06-11 The key aim of this new book is to show how economic decline has always been a highly politicised concept forming a central part of post war political argument In doing so Tomlinson reveals how the term has been used in such ways as to advance particular political causes *Rural China, 1901-1949* Wang Xianming, 2021-03-02 Highlighting the interwoven relationship between Chinese rural society and larger historical forces this book charts the evolution of China's rural society from 1901 to 1949 concentrating on the major changes of this period and the scenarios developed to modernize rural society during the half century leading up to the Revolution The modern history of rural China is one of sweeping institutional and structural transformation across many dimensions As the first half of the twentieth century unfolded against a backdrop of turbulent changes across a country that underwent industrialization urbanization and modernization China's agriculture rural population and rural communities encountered many crises but also showed remarkable resilience and capacity for adaptation and reform In each of the six chapters the author delves into one aspect or examines one period of this massive transformation and identifies the social economic political and cultural significance of these tumultuous processes at work The book will appeal to both scholars and general readers interested in modern Chinese history and the transformation of rural China **Medicine and Society in Wakefield and Huddersfield 1780-1870** Hilary Marland, 1987-09-24 This ambitious book presents an across the board study of medicine in any urban centre for any period of British history By selecting Wakefield and Huddersfield as contrasting types of northern towns and examining in details their systems of medical care Dr Marland has written a local history that says something important about the country as a whole Wakefield and Huddersfield contrasted in their economic demographic and social development during the late eighteenth and early nineteenth centuries allowing an effective comparative analysis of medical facilities in the two communities By drawing on diverse sources from Poor Law and philanthropy to self help organisations fringe medicine and medical practice the book places the development of medical services against the backdrop of the communities in which they evolved their class structure organization and social civic and economic developments
