important role it plays in human society **Filiation And Affiliation** Harold W Scheffler,2018-02-23 Announcements in the 1970s and 1980s of the death of kinship and descent as subjects of anthropological study were highly premature These subjects continue routinely to be encountered in the course of empirical ethnographic research and to be reported upon in ethnographies or they are ignored at the peril of ethnographers pathetically unprepared to deal with them Moreover considerable evidence has accumulated that systems of social relations built on relations of genealogical connection exhibit a remarkable degree of orderliness about which it is possible already to make a number of substantial empirical generalizations especially about the qualities of social relations within and between groups As the masters of the subject always stressed kinship and political and jural organization are closely interdependent structures In this wide ranging theoretical and comparative ethnographic study Harold Scheffler demonstrates that there is a simple reason why detection of this order has been too long delayed and has given rise to more destructive than to constructive debate in social anthropology

Companion Encyclopaedia of Anthropology Tim Ingold,2021-12-24 This comprehensive survey of contemporary thought in biological social and cultural anthropology sets the foundation for their future development and integration The principal rationale behind the Encyclopedia is to overcome the division and fragmentation within the approaches of the humanities and natural sciences to anthropology It emphasizes interconnections between perspectives and sub disciplines producing a complete perspective on what it means to be human The work consists of three parts Humanity Culture and Social Life and 40 major contributions Part One emphasizes human beings as members of a species how that species differs from others how it has evolved and how human populations have adapted to and in turn transformed their environments Part Two deals with the origin and structure of human culture and on the role of culture in action perception and cognition Part Three examines the various aspects of the relationships and processes that are carried on by persons and groups in the course of social life Useful features such as cross references within the text full biographical references suggestions for further reading and carefully illustrated line drawings make this an indispensable resource for all students of anthropology or sociology

Art and Creativity in a New Guinea Society Ross Bowden,2022-07-26 The Kwoma the subject of this book are one of a number of peoples in the Sepik River region of northern Papua New Guinea who have created some of the most distinctive visual art in the Pacific Through case studies of their painting sculpture architecture and ritual this book examines in detail how people in this society understand their art as a cultural phenomenon This includes how they understand its origins in the spirit world how they judge quality in art and how they understand artistic creativity The book contrasts Kwoma beliefs with the radically different approach to art found in the modern West The modern Western concept of art first emerged not in the eighteenth century in the Enlightenment or even later as anthropologists and art historians often assume but several centuries earlier in the Renaissance The book gives an account of radical changes that took place culturally in Europe between the twelfth and sixteenth centuries in the way human intellectual creativity was understood and

how this gave rise to a new concept of art one that remains unchanged in the modern West today **A Return to the Object** Susanne Küchler, Timothy Carroll, 2020-11-26 This book draws on the work of anthropologist Alfred Gell to reinstate the importance of the object in art and society Rather than presenting art as a passive recipient of the artist's intention and the audience's critique the authors consider it in the social environment of its production and reception A Return to the Object introduces the historical and theoretical framework out of which an anthropology of art has emerged and examines the conditions under which it has renewed interest It also explores what art does as a social and cultural phenomenon and how it can impact alternative ways of organising and managing knowledge Making use of ethnography museological practice the intellectual history of the arts and sciences material culture studies and intangible heritage the authors present a case for the re-orientation of current conversations surrounding the anthropology of art and social theory This text will be of key interest to students and scholars in the social and historical sciences arts and humanities and cognitive sciences *Mobile Pastoralism and the Formation of Near Eastern Civilizations* Anne Porter, 2012-03-26 In this book Anne Porter explores the idea that mobile and sedentary members of the ancient world were integral parts of the same social and political groups in greater Mesopotamia during the period 4000 to 1500 BCE She draws on a wide range of archaeological and cuneiform sources to show how networks of social structure political and religious ideology and everyday as well as ritual practice worked to maintain the integrity of those groups when the pursuit of different subsistence activities dispersed them over space These networks were dynamic shaping many of the key events and innovations of the time including the Uruk expansion and the introduction of writing so called secondary state formation and the organization and operation of government the literary production of the Third Dynasty of Ur and the first stories of Gilgamesh and the emergence of the Amorrites in the second millennium BCE **Anthropological and historical sciences. Mitra, 2021-09-05 This book first published in 1992 examines the attitudes of local elites the hinge between Indian state and rural society towards protest and participation in development illuminating arguments about the nature of the state as well as the development process It looks at the role of local elites in India both as the representatives of the state and of the rest of rural society and explains their importance in the country's development The book deals with the elites contribution to the credibility of the state and examines the strategies through which they manipulate the allocation of resources and influence the pace and direction of social change It contrasts the rural elites in two areas one more economically advanced than the other The elites in the first area were shown to be capable of combining institutional participation with radical protest whilst in the other they tended to rely on state channels to achieve reform The author concludes that despite the different settings both groups were informed active and responsive to political conditions This contrasts with the conventional view that local elites of the dominant castes oppress
