Frontier Thinking and Human-Nature Relations E. C. H. Keskitalo,2024-06-12 Combining historical social and regulative analysis this book builds a compelling critique of frontier thinking as it continues to form our assumptions about social and environmental organisation in ways that impact not least the present environmental crisis This book systematically identifies the ways in which images of nature and society are formed by the historically developed frontier oriented narratives which have underpinned much Anglo American and Anglocentric thought The book confronts these conceptions at large showing that they never held empirically and contrasts them with the situation in northern Europe where diverging assumptions are integral to this day Through this juxtaposition this book illustrates not only the pervasiveness of structures of understanding in steering policy but also the varying traditions regarding how understandings of the environment can be formed This study highlights how historical thought patterns formed for very different reasons than exist today continue to shape our assumptions about nature the relation between urban and rural areas and our understanding of ourselves in relation to the environment This book will be of wide interest to a range of academics and students in the fields of geography anthropology environmental studies sociology political science and development studies amongst others The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non

Rushdoony,2019-08-26 Faith and Action is the complete collection of the essays of R J Rushdoony written for the Chalcedon Report between 1965 and 2001 along with several transcripts of his recorded talks The large volume The Roots of Reconstruction only contained his Chalcedon Report essays up until 1985 so most of the essays included in Faith Action were unavailable to readers for many years until now In order to make the author s knowledge more accessible this three volume collection features some of the most extensive indexing we ve ever done including a General Index a History Index a Scripture Index a Works Cited Index and a Chalcedon Report Directory A total of 183 pages of indexing This handsome set of books is a must have for any serious library The central theme of this collection of essays is Christian Reconstruction which to Rushdoony meant the responsibility of Christian citizenship in the Kingdom of God For him his central drive behind his research and writing was to move men to faith and action Rushdoony was primarily an essayist who vigorously and prolifically wrote on a multiplicity of subjects issues

and disciplines Despite his being critical of both the contemporary church for its compromise and the humanistic state for its will to be as God these essays are replete with Rushdoony's undying faith in the victory of God in history Rushdoony's big idea was Christian Reconstruction which centered not on a pursuit of political power but rather an equipping of Christians to take back government by means of self government in terms of God's law This three volume collection will no doubt serve the larger church for many generations as they seek first the Kingdom of God in their spheres and in their times Proceedings of the National Conference of Social Work, Selected Papers ... Annual Meeting National Conference of Social Work (U.S.). Annual Meeting, 1945 Social Reconstruction Karen L. Riley, 2006-05-01 Social Reconstruction as a philosophy stream of thought or official program is often synonymous with Depression era Progressivism But Social Reconstruction unlike progressivism enjoyed political stardom The spirit of progressivism at least in terms of education found a home in those enthusiasts who supported a child centered perspective of education Others such as the essentialists viewed their progressive role as one that advanced the view of essential or basic education as the most sound approach to curriculum and teaching Still others more radical in their outlook believed that progress should be framed with questions about social justice and equity Proponents of social reconstruction included Harold Rugg and George Counts although the movement was rich with supporters To date social reconstruction is only a by word in most texts that deal with the Progressive Era or progressive education perhaps because Rugg and Counts the two most visible proponents sought and received the political limelight no matter how glaring In any event the depths of social reconstruction have yet to be plumbed Hence the first book in this series will offer a comprehensive treatment of Social Reconstruction which include chapters that examine its proponents political nature and social justice programs born of and within the tumultuous context of progressive politics

Resilience Thinking in Urban Planning Ayda Eraydin,Tuna Taşan-Kok,2012-11-29 There is consensus in literature that urban areas have become increasingly vulnerable to the outcomes of economic restructuring under the neoliberal political economic ideology The increased frequency and widening diversity of problems offer evidence that the socio economic and spatial policies planning and practices introduced under the neoliberal agenda can no longer be sustained As this shortfall was becoming more evident among urban policymakers planners and researchers in different parts of the world a group of discontent researchers began searching for new approaches to addressing the increasing vulnerabilities of urban systems in the wake of growing socio economic and ecological problems This book is the joint effort of those who have long felt that contemporary planning systems and policies are inadequate in preparing cities for the future in an increasingly neoliberalising world It argues that resilience thinking can form the basis of an alternative approach to planning Drawing upon case studies from five cities in Europe namely Lisbon Porto Istanbul Stockholm and Rotterdam the book makes an exploration of the resilience perspective raising a number of theoretical debates and suggesting a new methodological approach based on empirical evidence This book provides insights for intellectuals exploring alternative perspectives and principles of a new planning approach

Public Schools in Hard Times David B. Tyack,Robert Lowe,Elisabeth Hansot,1984 In the first social history of what happened to public schools in those years of the locust the authors explore the daily experience of schoolchildren in many kinds of communities the public school students of working class northeastern towns the rural black children of the South the prosperous adolescents of midwestern suburbs How did educators respond to the fiscal crisis and why did Americans retain their faith in public schooling during the cataclysm The authors examine how New Dealers regarded public education and the reaction of public school people to the distinctive New Deal style in programs such as the National Youth Administration They illustrate the story with photographs cartoons and vignettes of life behind the schoolhouse door Moving from that troubled period to our own the authors compare the anxieties of the depression decade with the uncertainties of the 1970s and 1980s Heirs to an optimistic tradition and trained to manage growth school staff have lately encountered three shortages of pupils money and public confidence Professional morale has dropped as expectations and criticism have mounted Changes in the governing and financing of education have made planning for the future even riskier than usual Drawing on the experience of the 1930s to illuminate the problems of the 1980s the authors lend historical perspective to current discussions about the future of public education They stress the basic stability of public education while emphasizing the unfinished

Bradley MacKay, Peter McKiernan, 2018-10-04 This Element infuses established scenario planning routines with an exploration of cognitive reasoning by contextualising scenario thinking within the wider human endeavour of grappling with future uncertainties A study of ancient civilisations shows that scenario thinking is not new but has evolved significantly since ancient times By decoupling scenario thinking from scenario planning it is elevated as the essential ingredient in managerial foresight projects The historical theme continues focussing on the evolution of modern scenario planning by way of the French and Anglo American schools of thought using the intuitive logics methodology Archival research has discovered early contributions in the UK around the development and use of scenario thinking in public policy which has been overlooked in many received histories Finally the usefulness of scenario thinking for strategic management is challenged here and the argument that it is a heuristic device for overcoming cognitive biases and making better strategic decisions is refined *Curriculum for Utopia* William B. Stanley, 1992-07-01 This book examines the relationship between contemporary forms of critical theory and social reconstructionism as they relate and contribute to the construction of a radical theory of education It illustrates many of the persistent issues problems and goals of radical educational reform including the importance of developing a language of possibility utopian thought and the critical competence necessary to reveal and deconstruct forms of oppression Stanley perceptively and clearly reexamines new challenges posed to various forms of critical pedagogy including reconstructionism by the development of postmodern and poststructuralist theory focusing on the connections and continuities between them
