Social Psychology Robert Harvey Gault, 1923 *An Introduction to Social Psychology* Luther Lee Bernard, 1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy

into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO

Social Beings Susan T. Fiske, 2018-08-14 It is a nearly universal truth that people need people; humans have adapted to life with other humans and the interactions and relationships that result are the most relevant adaptation environment. This book explores the core motives and goals that shape these interactions with others, with the self, and collectively as a group. In other words: Why do people do what they do? A brief overview of the field's unifying themes (belonging, understanding, controlling, enhancing self, and trusting) gives way to a detailed exploration of the human condition as well as the techniques used to study and understand it. By delving into the motivations behind attraction, helping, bias, persuasion, aggression, and more, this book helps students grasp the complex interplay of internal and external cues and influences that inform every interaction. An emphasis on real-world applications relates social psychology principles to everyday life, and this latest revision has been updated with the most recent research and trends to provide an accurate picture of the state of the field. Blending traditional topics with new developments in an informal, readable style makes this the ideal text to ignite students' deeper interest and full engagement with social psychology concepts.
