Every American an Innovator
Matthew Wisnioski, 2025-05-13 A landmark cultural history that reveals how the relentless pursuit of innovation has transformed our society our institutions and our inner selves For half a century innovation served as a universal good in an age of fracture That consensus is cracking While the imperative to innovate for a better future continues to fuel systemic change around the world critics now assail innovation culture as an engine of inequality or accuse its do-gooders of woke groupthink What happened Drawing on a decade of research Every American an Innovator by Matthew Wisnioski investigates how innovation a once obscure academic term became ingrained in our institutions our education and our beliefs about ourselves Wisnioski argues that innovation culture did not spring from the digital revolution nor can it be boiled down to heroic entrepreneurs or villainous capitalists Instead he reveals the central role of a new class of experts in spreading toolkits and mindsets from the cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society's most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon's dream of a Nobel Prize for innovators how anti-military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute

Finding your Social Science Project

John Gerring,Jason Seawright,2022-10-13 The most important step in social science research is the first step finding a topic Unfortunately little guidance on this crucial and difficult challenge is available Methodological studies and courses tend to focus on theory testing rather than theory generation This book aims to redress that imbalance The first part of the book offers an overview of the book s central concerns How do social scientists arrive at ideas for their work What are the different ways in which a study can contribute to knowledge in a field The second part of the book offers suggestions about how to think creatively including general strategies for finding a topic and heuristics for discovery The third part of the book shows how data exploration may assist in generating theories and hypotheses The fourth part of the book offers suggestions about how to fashion disparate ideas into a theory
