A Global Perspective on the European Economic Crisis Bruno Dallago, Gert Guri, John McGowan, 2018-10-24 The financial and economic crisis in Europe is not over and the radically opposing strategies on how to proceed has only increased the complexity of problems in the region revealing the shortcomings of the EU's architecture The European Union perhaps for the first time in its history of more than seventy years is being perceived as a threat to the financial and monetary stability of the world *A Global Perspective on the European Economic Crisis* explores the connection between internal EU actions and institutions and the external factors that influence the ongoing response to the European crisis With a unique collection of international and interdisciplinary essays this book considers the complex macroeconomic and challenging political landscape of Europe looking at how and why the European Union is untenable in its current state The chapters outline what should be done to make the common currency area more resilient and explain why external events are particularly problematic for the EU ultimately offering suggestions for what Europeans should do in order to avoid harmful internal consequences This volume confronts the causes of the crisis persistence its economic and political consequences and the impact of more recent events and policy decisions It will be of

interest to researchers and policy makers keen to understand the EU relations and the influence of international organizations in the European economic crisis *Global Perspectives on Corporate Governance and CSR* Güler Aras, 2016-04-22 Good governance is good PR it is important in every sphere of society whether it be the corporate environment the political or wider society When resources are too limited to meet the minimum expectations of the people it is a good governance level that can help to promote the welfare of society Enlightened companies recognise that there is a clear link between governance and corporate social responsibility and make efforts to link the two Unfortunately this is too often no more than making a claim that good governance is a part of their CSR policy as well as a part of their relationship with shareholders Corporate Governance and CSR are significant issues in all parts of the world huge amounts of time and energy are devoted to its global interpretation Most analysis however is too simplistic to be helpful as it normally resolves itself into simple dualities rules based v principles based or Anglo Saxon v Continental The editors of this book argue that this is not helpful that the reality is far more complex They show that Corporate Governance and CSR cannot be understood without taking geographical cultural and historical factors into account It is necessary they say to understand the concerns of people in different parts of the world Therefore by using a wealth of case studies theoretical models and drawing on the knowledge and perspective of experts from around the world the editors have produced this valuable book *Global Perspectives on Corporate Governance and CSR* discusses issues such as regional and cultural similarities and differences the contexts of differing legal frameworks and governance codes differences between large companies and SMEs governance in new environments companies and economies versus stable environments and the changing environment affecting corporate social responsibility around the world The editors then synthesise this in a way that will be helpful to business people as well as to academics **Contractualisation of Family Law - Global Perspectives** Frederik

Swennen, 2015-07-06 This volume presents global and comparative perspectives on the perpetual pendular movement of family law between status and contract It contributes to the topical academic debate on family law exceptionalism by exploring the blurred lines between public law private law and family law and sheds light on the many shades of grey that exist The contributions focus on both substantive and procedural family law on parents and children and on life partners with particular attention for contractual arrangements of family formations and of conflict resolution The hypothesis underlying all contributions was the trend towards contractualisation of family law A convergent research outcome resulting from the comparison of national reports was the ambivalent position of family law in legal systems worldwide That comparison shows that whereas family law is clearly moving towards contract with regard to old family formations the contrary is true for new family formations The movement towards contract is rarely considered to be contractualisation *pur sang* with civil effect The movement towards status finally does not necessarily witness family law exceptionalism *vis vis* private law in view of the increasing State interventionism in private law relations in general In sum as the volume shows the high permeability of the

demarcations between the State the family and the market impedes a categorial approach This volume is based on the general and selected national reports on the topic Contractualisation of Family Law that were presented at the XIXth International Congress of Comparative Law in Vienna in July 2014 *Urban Economics: A Global Perspective* Paul N. Balchin, David Isaac, Jean Chen, 2019-02-14 The purpose of this book is to provide a key text on urban economics in a global context The book is driven by the themes of urban economics urban growth housing property investment and development etc and the different approaches to these themes taken in different regions of the world are introduced and exemplified in boxes within each chapter
