Malcolm Pines, Robert Lipgar

Social Selves Theories Of The Social Formation Of Personality:

Social Selves, 1993 The Development of the Social Self Mark Bennett, Fabio Sani, 2004-07-31 Drawing upon the perspective of social identity theory The Development of the Social Self is concerned with the acquisition and development of children s social identities In contrast to previous work on self development which has focused primarily on the development of the personal self this volume makes a case for the importance of the study of the social self that is the self as defined through group memberships such as gender ethnicity and nationality A broad range of identity related issues are addressed such as ingroup identification conceptions of social identities prejudice and the central role of social context Based on contributions from leading researchers in Europe Australia and the US the book summarises the major research programmes conducted to date Furthermore the closing chapters provide commentary on this research as well as mapping out key directions for future research With a unique focus encompassing both social and developmental psychology The Development of the Social Self will appeal to a broad spectrum of students and researchers in both disciplines as well as those working in related areas such as sociology and child development Twentieth-Century Multiplicity Daniel H. Borus, 2011-12-12 The book describes the ways in which American thinkers and artists in the first two decades of the twentieth century challenged notions that a single principle explained all relevant phenomena opting instead for a pluralistic world in which many truths goods and beauties coexisted It argues that the bracketing of the idea that all knowledge was integrated allowed for a new appreciation of the importance of context and contingency **Dismembering the American Dream** Kate Charlton-Jones, 2014-08-30 A detailed study of Yates s novels and stories Provided by publisher Theology, Psychology and the Plural Self Léon Turner, 2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self s unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology s dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology s blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts *The Darkest Days of My Life* Natasha S. Mauthner, 2002 The resulting depression how it is experienced and how it might be relieved is the

subject of Natasha Mauthner's insightful and compassionate book which recounts the stories of new mothers caught between a cultural ideal and a far more complex reality

Virtual Selves, Real Persons Richard S. Hallam, 2009-05-28 How do we know and understand who we really are as human beings The concept of the self is central to many strands of psychology and philosophy This book tackles the problem of how to define persons and selves and discusses the ways in which different disciplines such as biology sociology and philosophy have dealt with this topic Richard S Hallam examines the notion that the idea of the self as some sort of entity is a human construction and in effect a virtual reality At the same time this virtual self is intimately related to the reality of ourselves as biological organisms Aiming to integrate a constructionist understanding of self with the universalizing assumptions that are needed in natural science approaches this text is unique in its attempt to create a dialogue across academic disciplines while retaining a consistent perspective on the problem of relating nature to culture

Breaking the Silence on Spiritual Abuse L. Oakley, K. Kinmond, 2013-10-17 Providing a balance of empirical research and practical concerns this book explores the definitions and historical context of spiritual abuse outlines a process model for the different stages of spiritual abuse and includes strategies for therapists working with survivors of spiritual abuse

Picturing the Self Gen Doy, 2004-09-24 Ideas of selfhood from Descartes theory of I think therefore I am to postmodern notions of the fragmented and de-centred self have been crucial to the visual arts Gen Doy explores this relationship from Holbein's Ambassadors and the early modern period up to and beyond Marc Quinn's Self Blood Head Arguing that the importance of subjectivity for art goes far beyond self portraits she explores such topics as self expression the self work and consumption self presentation photography and the theatre of the self the marginalized beggars and asylum seekers and the real me A wide range of artists including Tracey Emin Jeff Wall Eugene Palmer and Karen Knorr are discussed as well as historical material from earlier periods

The Modern Construction and Postmodern Deconstruction of Self Kire Sharlamanov, Mia Kostovska, 2025-02-21 This book aims to explain the self as understood decades ago and its evolution in the time of postmodernism Approaching it primarily from a sociological perspective while incorporating insights from psychology and philosophy it portrays the modern self as a unitary coherent unified subject created in the time of modernity which during postmodernism has evolved into a fluid decentralized and fragmented subject with increasingly independent multiple identities The creation of the modern self has been influenced by individualization rationalization and power Each factor is explored in a separate chapter detailing its impact on the development of the modern Cartesian self The authors draw on the theories of Goffman Bauman and Baudrillard to illustrate the changing nature of the self viewing it as a performer a fluid entity and a simulacrum While Goffman is not strictly a postmodern author his ideas foreshadow postmodernism particularly regarding the transformation of the self Bauman and Baudrillard as key figures in postmodern thought provide valuable insights into this transformation of the self in contemporary times The book uniquely connects two time periods in which the self evolves arguing that social factors influence its changing characteristics As these

social factors shift over time so does the self Key aspects of the self and its evolution are examined through an original multidimensional approach that spans a longer time interval **Technologies of the Self-Portrait** Gabriella Giannachi, 2022-07-29 This book demonstrates how artists have radically revisited the genre of the self portrait by using a range of technologies and media that mark different phases in what can be described as a history of self or selves production Gabriella Giannachi shows how artists constructed their presence subjectivity and personhood by using a range of technologies and media including mirrors photography sculpture video virtual reality and social media to produce an increasingly fluid multiple and social representation of their self This interdisciplinary book draws from art history performance studies visual culture new media theory philosophy computer science and neuroscience to offer a radical new reading of the genre **Challenges to Theoretical Psychology** International Society for Theoretical Psychology. Conference, Wolfgang Maiers, 1999 **Moving Beyond Individualism in Pastoral Care and Counseling** Barbara J McClure, 2011-10-27 Despite astute critiques and available resources for alternative modes of thinking and practicing individualism continues to be a dominating and constraining ideology in the field of pastoral psychotherapy and counseling Philip Rieff was one of the first to highlight the negative implications of individualism in psychotherapeutic theories and practices As heirs and often enthusiasts of the Freudian tradition of which Rieff and others are critical pastoral theologians have felt the sting of his charge and yet the empirical research that McClure presents shows that pastoral counseling practitioners resist change Their attempts to overcome an individualistic perspective have been limited and ineffective because individualism is embedded in the field's dominant theological and theoretical resources practices and organizational arrangements Only a radical reappraisal of these will make possible pastoral counseling practices in a post individualistic mode McClure proposes several critical transformations broadening and deepening the operative theologies used to guide the healing practice expanding the role of the pastoral counselor reimagining the operative anthropology reclaiming sin and judgment nuancing the particular against the individual rethinking the ideal outcome of the practices and reimagining the organizational structures that support the practices Only this level of revisioning will enable this ministry of the church to move beyond its individualistic limitations and offer healing in more complex effective and socially adequate ways

Coercion, Cooperation, and Ethics in International Relations Richard Ned Lebow, 2007-05-07 This volume brings together the recent essays of Richard Ned Lebow one of the leading scholars of international relations and US foreign policy Lebow s work has centred on the instrumental value of ethics in foreign policy decision making and the disastrous consequences which follow when ethical standards are flouted Unlike most realists who have considered ethical considerations irrelevant in states calculations of their national interest Lebow has argued that self interest and hence national interest can only be formulated intelligently within a language of justice and morality The essays here build on this pervasive theme in Lebow s work by presenting his substantive and compelling critique of strategies of deterrence and compellence illustrating empirically and normatively how these strategies often produce results counter to those that are intended The last section of the book on counterfactuals brings together another set of related articles which continue to probe the relationship between ethics and policy They do so by exploring the contingency of events to suggest the subjective and often self fulfilling nature of the frameworks we use to evaluate policy choices The Psychological Power of Language Sayyed Mohsen Fatemi, 2018-07-11 This volume shows how the psychology and power of language can create realities It examines the

psychological implications of language as a way of being and not just as an instrument of communication It discusses how a shift in language gives rise to an existential transformation and shows how creative modes of expression lead to a radical transformation of beings Throughout both the theoretical and practical implications of the psychological power of language are presented particularly how language may result in a healthier inter and intrapersonal world It will interest upper level students and researchers of language in Psychology Linguistics Philosophy and Education as well as professional counselors
