
Social Work, Health and Equality

Deepening health inequalities, the restructuring of the welfare state involving the fragmentation of social work as a recognisable discipline and popular disaffection with health and welfare professionals underline the need to rethink social work's contribution to people's health.

In three main ways *Social Work, Health and Inequality* suggests what social work can contribute to people's health:

- the magnitude of the profound and unjust human suffering which arises from the impact of social inequalities on health should be a matter of urgent concern to social workers.
- through focusing on this problem, social work can make a significant contribution to more equal chances and experiences of health and illness.
- to make such an impact requires major shifts in the conceptualisation, practice and organisation of social work.

Social Work, Health and Equality will be essential reading to trainees and professionals in social work and health care.
