Socio Economic Modelling And Forecasting In Developing Countries:

Socio-economic Modelling and Forecasting in Developing Countries Mirek Karasek, Waddah K. Alem, Wasfy B. Iskander, 1988 **The Socioeconomic Impact Of Resource Development** F. Larry Leistritz, Steve H. Murdock, F. Larry Leistritz, 2019-06-26 Large scale industrial and energy development projects are profoundly affecting the social and economic climate of rural areas across the nation creating a need for extensive planning information both to prepare for the effects of such developments and to meet state and federal environmental impact assessment requirements This book examines alternative methods of modelling the economic demographic public service fiscal and social impacts of major development projects The authors provide a synthesis of the conceptual bases estimation techniques data requirements and types of output available focusing on models that address multiple impact dimensions and produce information at the county and subcounty levels They also look at the kind of data each model produces in each impact category **Optimization:**

Techniques And Applications (Icota '95) G Z Liu, 1995-09-01 With the advent of powerful computers and novel mathematical programming techniques the multidisciplinary field of optimization has advanced to the stage that quite complicated systems can be addressed The conference was organized to provide a platform for the exchange of new ideas and information and for identifying needs for future research The contributions covered both theoretical techniques and a rich variety of case studies to which optimization can be usefully applied *Economic Planning and Social Justice in Developing Countries* Ozay Mehmet, 2014-05-12 First published in 1978 this book was written at a time when belief was high in Western guided economic development of the emerging countries The success of Marshall Plan in war torn Europe generated a US led optimism that with generous inflows of aid and technical assistance the Third World could be won over in the Cold War The author's direct experience as a young academic economist in Cyprus Malaysia Uganda and Liberia led him to question this general optimism the reality on the ground in the developing world did not seem to match Western optimism Theories and blueprints made in the West did not fit the requirements of developing countries Higher production and better income distribution were inseparable twin objectives of developing nations That meant production of a higher national output must at the same time promote social justice Investment must create adequate jobs so that new entrants into rapidly expanding labor force could be gainfully employed Yet the dominant Western theories of development at the time in particular the Trickle Down Theory of Growth prescribed Growth First Distribution Later strategy Similarly Import Substitution Industrialization theories were emphasized at the expense of export led growth Dualistic Growth theories preached urban biased anti rural development This book was written as a rebuttal of such faulty theorizing and misguided professional technical assistance and the book's message is no less valid today than in the 1970's Economic Activity and Land Use The Changing Information Base for Local and Regional Studies Michael J. Healey, 2014-10-13 Concerned primarily with statistical data this text aims to provide a guide to the nature uses availability and limitations of the main data sources

for interpreting and undertaking regional studies of economic activity It also considers the methods used for the collection of this data

Environmental Assessment of Socioeconomic Systems D. Burkhardt, 2013-03-09 Neglect of the relation between the socio economic system and its natural environment has had detrimental consequences in the past for example the pollution of the natural environment water air and soil by producing using and consuming the products of our industrialized economy the foreseeable exhaustion of natural resources by continuing the increase of industrial production Most of the recent activities both in research and in administration against these impacts have been technically oriented with the aim of stimulating and introducing new technologies of production and new products to diminish the environmental pollution But these efforts which are of course necessary cannot be successful in approaching the aim which should and must in the long term view be defined as the development of society in balance with the natural environment Therefore in addition to an assessment of technologies emphasis should be put on an assessment of socio economic systems On different levels individual and social preferences determine quantities and qualities of production and consumption using economical values e.g market prices as regulators Following this argumentation an environment assessment of activities against pollution has especially to consider the social response to environmental impacts Of course this topic must be a subject of interdisciplinary research The challenge concerned in this context is to increase the knowledge of the relationship between social economic and technical subsets

Econometric Models of Asian-Pacific Countries Shinichi Ichimura, Yasumi Matsumoto, 2012-12-06 This book is a sequel to our first report of ASIAN LINK PROJECT in 1985 Econometric Models of Asian LINK Springer Verlag Tokyo Berlin New York Now the scope is expanded to Asian Pacific Countries in coverage so that this monograph presents the econometric models of Japan the United States Canada China Korea Taiwan Hong Kong Thailand the Philippines Malaysia Singapore Indonesia Australia and the European Community We are particularly happy to have included the excellent models of Australia and Canada whose economies are essential parts of the Asian Pacific Economic Community Most of those models were presented at the Workshop of Asian Link Project held in Bandung Indonesia at the time of the Second Convention of the East Asian Economic Association 1990 Those models have been updated since then and several other important models were added Unlike our previous book we have not tried here to link these national

models as a regional or global model in any way except for the model by S Kinoshita which offers a regional linkage for Pacific basin economies by linking the US Japan Canada the European Community countries as a group Asian NIEs Korea Hong Kong Taiwan ASEAN Indonesia Malaysia the Philippines Singapore and East Asian economies As we argued in our previous publication we tried to publish these econometric models again with the statistical data as much as we could so as to enable the reader examine the estimation and performance of the models by himself

The Future of the World Jenny Andersson, 2018-07-19 The Future of the World is devoted to the intriguing field of study which emerged after World War Two futurism or futurology Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world Futurists were a motley crew of Cold War warriors nuclear scientists journalists and peace activists Some argued it should be a closed sphere of science defined by delimited probabilities They were challenged by alternative notions of the future as a potentially open realm Futurism also drew on an eclectic range of repertoires some of which were deduced from positivist social science mathematics and nuclear physics and some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists
