known about these youth outside of their own countries since the mainstream views on youth and youth culture are derived from the available literature on youth in the industrialized West which is home to a small part of the world's youth. This book aims to help fill in this gap. The handbook examines the state of youth, their past, present, and permits the development of insights about the future. The BRICS countries have all engaged in development processes and some remarkable improvements in young people's lives over recent decades are documented. However, the chapters also show that these gains can be undermined by instabilities, poor decisions, and external factors in those countries. Periods of economic growth, political progress, cultural opening up, and subsequent reversals rearticulate differently in each society. The future of youth is sharply impacted by recent transformations of economic, political, and social realities. As new opportunities emerge and the influence of tradition on youth's lifestyles weakens and as their norms and values change, the youth enter into conflict with dominant expectations and power structures. The topics covered in the book include politics, education, health, employment, leisure, Internet identities, inequalities, and demographics. The chapters provide original insights into the development of the BRICS countries and place the varied mechanisms of youth development in context. This handbook serves as a reference to those who are interested in having a better understanding of today's youth. Readers will become acquainted with many issues that are faced today by young people and understand that through fertile dialogues and cooperation, youth can play a role in shaping the future of the world.

Trust and Technology in a Ubiquitous Modern Environment: Theoretical and Methodological Perspectives Latusek, Dominika, Gerbasi, Alexandra, 2010-04-30. This book brings together scholars with significantly different backgrounds who share interests in the interplay between trust and technology, presenting novel theoretical perspectives on the topics of trust and technology as well as some empirical investigations into the trust-building, trust-repairing, and trust-destroying practices in the context of technology.
