Nonformal Education and Civil Society in Japan Kaori H. Okano, 2015-09-16 Nonformal Education and Civil Society in Japan critically examines an aspect of education that has received little attention to date intentional teaching and learning activities that occur outside formal schooling In the last two decades nonformal education has rapidly increased in extent and significance This is because individual needs for education have become so diverse and rapidly changing that formal education alone is unable to satisfy them Increasingly diverse demands on education resulted from a combination of transnational migration heightened human rights awareness the aging population and competition in the globalised labour market Some in the private sector saw this situation as a business opportunity Others in the civil society volunteered to assist the vulnerable The rise in nonformal education has also been facilitated by national policy developments since the 1990s Drawing on case studies this book illuminates a diverse range of nonformal education activities and suggests that the nature of the relationship between nonformal education and mainstream schooling has changed Not only have the two sectors become more interdependent but the formal education sector increasingly acknowledges nonformal education's important and necessary roles These changes signal a significant departure from the past in the overall functioning of Japanese education The case studies include neighbourhood homework clubs for migrant children community based literacy classes after school care programs sport clubs alternative schools for long term absent students schools for foreigners training in intercultural competence at universities and corporations k minkan community halls and lifelong learning for the seniors This book will appeal to both scholars of Japanese Studies Asian Studies and those of comparative education and sociology anthropology of education

Transactions of the Asiatic Society of Japan Asiatic Society of Japan, 1904 Transactions of the Asiatic Society of Japan, 1924 Images Of Japanese Society Hb Ross Mouer, Yoshio Sugimoto, 2013-10-28 The popular image of Japanese society is a stereotypical one that of a people characterised by a coherent set of thought and behaviour patterns applying to all Japanese and transcending time Ross Mouer and Yoshio Sugimoto found this image quite incongruous during their research for this book in Japan They ask whether this stereotype of the Japanese is not only generated by foreigners but by the Japanese themselves This is likely to be a controversial book as it does not contribute to the continuing mythologising of Japan and the Japanese The book examines contemporary images of Japanese society by surveying an extensive sample of popular and academic literature on Japan After tracing the development of holistic theories about the Japanese commonly referred to as the group model

attention is focused on the evaluation of that image Empirical evidence contrary to this model is discussed and methodological lacunae are cited A sociology of Japanology is also presented In pursuit of other visions of Japanese society the authors argue that certain aspects of Japanese behaviour can be explained by considering Japanese society as the exact inverse of the portrayal provided by the group model The authors also present a multi dimensional model of social stratification arguing that much of the variation in Japanese behaviour can be understood within the framework as having universal equivalence

The State of Civil Society in Japan Frank J. Schwartz, Susan J. Pharr, 2003-10-20 Table of contents

The Demography of Remarriage in Japan James M. Raymo, Erika Teramoto, Shohei Yoda, Miho Iwasawa, Setsuya Fukuda, 2024-07-31 This book provides the first comprehensive demographic overview of remarriage in Japan Despite the fact that nearly one in five marriages in Japan now involves at least one formerly married spouse very little is known about the nature of remarriages and how they differ from first marriages One important focus of this book is to examine fertility intentions and outcomes in remarriages and to compare them with marriages in which both partners are in their first marriage It is well known that low rates of first marriage contribute to Japan's very low total fertility rate TFR but there is currently no theoretical or empirical basis for understanding how levels and patterns of remarriage are related to the TFR To understand trends and patterns of remarriage in Japan the book begins with an overview of the voluminous research literature on remarriage in the USA and other Western countries This overview consists of a summary of trends and theoretical frameworks for understanding remarriage and is followed by a summary of existing research on correlates of remarriage and outcomes associated with higher order marriages Of particular importance is the attention paid to stepfamily fertility and the extent to which remarriage is associated with overall levels of fertility An important contribution of this book is its presentation of basic descriptive information about levels and correlates of remarriage in Japan These descriptive analyses are based on published data in the vital statistics reports and individual level data from the National Fertility Surveys conducted by the National Institute of Population and Social Security Research and the National Survey of Households with Children conducted by the Japan Institute for Labour Policy and Training
