The Future of International Relations Iver B. Neumann, Ole Wæver, 2005-06-29 This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers John Vincent Kenneth Waltz Robert O Keohane Robert Gilpin Bertrand Badie John Ruggie Hayward Alker Nicholas G Onuf Alexander Wendt Jean Bethke Elshtain R B J Walker and James Der Derian The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others presenting them as part of a disembodied school of thought or paradigm A more individual focus can demonstrate instead the well rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with The essays can be read either as introductions to the work of these theorists or as companions to it Each chapter attempts to place the thinker in the landscape of the discipline to identify how they go about studying International Relations and to discuss what others can learn from them

HabitusAnalysis 1 Heinrich Wilhelm Schäfer, 2015-04-20 This book is the first of three volumes of HabitusAnalysis that take the sociology of Pierre Bourdieu as a starting point to develop a methodical approach to the habitus of social actors However the concept of habitus and Bourdieu's approach to language are somewhat disputed while his relationist epistemology is seldom paid tribute to The present volume therefore in its first part deals with Bourdieu's roots in relationist Neo Kantian philosophy the basic traits of his relationist sociology The second part examines Bourdieu's theoretical and empirical work on language before elaborating its own praxeological concept of language use that opens the road to a methodically and theoretically sound reconstruction of the habitus of social actors In the second volume of HabitusAnalysis we will carefully re-read Bourdieu's theory in order to develop a disposition based theory of the habitus that emphasizes the creative potential of the linkage between mental orientations and socio structural processes classification and classes as well

as dispositions and positions The method presented in the third volume will facilitate a detailed empirical analysis of the creative transformations operated by the habitus in relation with the social structures of domination and the dynamics of social differentiation

Thinking Through Methods John Levi Martin, 2017-02-08 Sociological research is hard enough already you don't need to make it even harder by smashing about like a bull in a china shop not knowing what you're doing or where you're heading Or so says John Levi Martin in this witty insightful and desperately needed primer on how to practice rigorous social science Thinking Through Methods focuses on the practical decisions that you will need to make as a researcher where the data you are working with comes from and how that data relates to all the possible data you could have gathered This is a user's guide to sociological research designed to be used at both the undergraduate and graduate level Rather than offer mechanical rules and applications Martin chooses instead to team up with the reader to think through and with methods He acknowledges that we are human beings and thus prone to the same cognitive limitations and distortions found in subjects and proposes ways to compensate for these limitations Martin also forcefully argues for principled symmetry contending that bad ethics makes for bad research and vice versa Thinking Through Methods is a landmark work one that students will turn to again and again throughout the course of their sociological research
