The Harmonic Origins of the World Richard Heath,2018-03-20 A profound exploration of the simple numerical ratios that underlie our solar system its musical harmony and our earliest religious beliefs Reveals how the orbits of Jupiter Saturn and Uranus relate to the Moon and the inner planets as an octave with musical scales Explores how this harmonic planetary knowledge was encoded within ancient monuments and temples then spread within oral traditions Explains how the solar system functions as a musical instrument and how this led to the rise of intelligent life civilization and culture on our planet As modern humans first walked the Earth roughly 70 000 years ago the Moon s orbit came into harmonic resonance with the outer planets of Jupiter Saturn and Uranus The common denominators underlying these harmonic relationships are the earliest prime numbers of the Fibonacci series two three and five the same numbers that interact to give us the harmonic relationships of music Exploring the simple mathematical relationships that underlie the cycles of the solar system and the music of Earth Richard Heath reveals how Neolithic astronomers discovered these ratios using megalithic monuments like Stonehenge and the Carnac stones discoveries that informed later myths and stories including the Epic of Gilgamesh the Resurrection of Osiris the Rg Veda the Hebrew Bible Homer s epic tales and the Return of Quetzalcoatl He explains how this harmonic planetary knowledge formed the basis of the earliest religious systems in which planets were seen as gods and shows how they spread through Sumer Egypt and India into Babylon Judea Mexico and archaic Greece He exposes how the secret knowledge encoded within the Bible s god YHWH was lost as Greek logic and reason steadily weakened mythological beliefs Revealing the mysteries of the octave and of our musical scales Heath shows how the orbits of the outer and inner

planets gave a structure to time which our Moon's orbit could then turn into a harmonic matrix. He explains how planetary time came to function as a finely tuned musical instrument leading to the rise of intelligent life on our planet. He demonstrates how this harmonic science of numbers can be read in the secret symbolism and sacred geometry of ancient cities such as Teotihuacan and in temples such as the Parthenon connecting the higher worlds of planetary time and harmonics with the spiritual and physical life on Earth. Recasting our understanding of the solar system, Heath seeks to reawaken humanity's understanding of how sacred numbers structure reality, offering an opportunity to recover this lost harmonic doctrine and reclaim our intended role in the outer life of our planet.

Precessional Time and the Evolution of Consciousness Richard Heath, 2011-06-23

How stories enable us to identify the inner spiritual aspects within our material world and participate in the evolution of human consciousness foretold by ancient myths. Reveals the heightened creativity necessary and available during a precessional shift between ages. Identifies where and how cosmic energies of consciousness and creativity can be found using principles developed by G. I. Gurdjieff and John G. Bennett. Explores how myths, megaliths, language, and cave art enabled narratives shaped by sacred proportion. All of culture can be said to be made up of stories. In fact, it is stories more than language, tools, or intellect that make us human. Our Neolithic and Megalithic ancestors recognized this and stored within their mythic narratives an understanding of how sky changes evoke changes in consciousness as human cultures progress through each Zodiacal Age of the precessional cycle. As we enter the Age of Aquarius, it is time to recognize the profound power of stories to give our world meaning. Exploring how ancient myths, megalithic structures, the formation of language, and even prehistoric cave art are narratives shaped by sacred proportion. Richard Heath explains that stories enable us to identify the inner spiritual aspects within our material world and participate in the evolution of human consciousness. He reveals how the precessional myth of the hero's journey to steal fire from heaven describes a necessary search for new cultural modes that occurs at the end of an Age as the dominant culture begins to falter and how the massive information bubble created by our modern world while drowning us in meaningless narratives also contains the components for an evolutionary shift in consciousness. Presenting key principles advanced by G. I. Gurdjieff and John G. Bennett to help us awaken to the continuing evolution of our consciousness, Heath shows how to access the spiritual intelligence and heightened creativity available during the galactic alignment of the current twilight between two precessional ages.
