The Natural:

The Natural Problem of Consciousness Pietro Snider, 2017-06-12 The Natural Problem of Consciousness is the problem of understanding why there are presently conscious beings at all. Given a non-reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon, how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel rather than having developed as a zombie world in which there would be no conscious experiences of any kind. This book introduces the Natural Problem by relating it to central problems in the philosophy of mind: metaphysical mind-body problem, Hard Problem of consciousness, and emphasizing the distinctive interest of its diachronic dimension. Ranging from philosophy to biology and neuroscience, it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection. This is an original, engaging, and thought-provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness. Emblems and the Natural World

Paul J. Smith, Karl A.E. Enenkel, 2017-09-11 Since its invention by Andrea Alciato, the emblem is inextricably connected to the natural world. Alciato and his followers drew massively their inspiration from it. For their information about nature, the emblem authors were greatly indebted to ancient natural history, the medieval bestiaries, and the 15th and 16th-century proto-emblematics, especially the *imprese*. The natural world became the main topic of, for instance, Camerarius's botanical and zoological emblem books and also of the applied emblematics in drawings and decorative arts. Animal emblems are frequently quoted by naturalists: Gesner, Aldrovandi. This interdisciplinary volume aims to address these multiple connections between emblematics and Natural History in the broader perspective of their underlying ideologies: scientific, artistic, literary, political, and/or religious. Contributors: Alison Saunders, Anne Rolet, Marisa Bass, Bernhard Schirg, Maren Biederbick, Sabine Kalff, Christian Peters, Frederik Knechtel, Agnes Kusler, Aline Smeesters, Astrid Zenker, Tobias Bulang, Sonja Schreiner, Paul Smith, and Karl Enenkel. **Behavior and the Natural Environment**

Irwin Altman, Joachim F. Wohlwill, 2012-12-06 The theme of the present volume concerns people's response to the natural environment, considered at scales varying from that of a household plant to that of vast wilderness areas. Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter, and in part by the relative neglect of this topic in standard treatments of the environment-behavior field. It also serves to bring out once again the interdisciplinary nature of that field, and we are pleased to have been able to include representatives from geography, sociology, social ecology, and natural recreation among our contributors. We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a very diverse array of publications representing a similarly varied group of specialties. It is hoped that the result will be to stimulate future development of this area and to add a measure of in-

creased coherence to it Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor The titles of the papers comprising Volume 7 are shown on page v Irwin Altman Joachim F Wohlwill ix Contents Introduction **Religion and the Natural Sciences** James E.
