The Nature Of Prosocial Development Interdisciplinary Theories And Strategies Developmental Psychology Series:

The Nature of Prosocial Development Diane Bridgeman,1983 **The Oxford Handbook of Moral Development** Lene Arnett Jensen,2020-01-24 The nature of people's moral lives the similarities and differences in the moral concepts of individuals and groups and how these concepts emerge in the course of human development are topics of perennial interest. In recent years the field of moral development has turned from a focus on a limited set of theories to a refreshingly vast array of research questions and methods. This handbook offers a comprehensive international and up to date review of this research on moral development. Drawing together the work of over 90 authors hailing from diverse disciplines such as anthropology, education, human development, psychology and sociology, the handbook reflects the dynamic nature of the field. Across more than 40 chapters, this handbook opens the door to a broad view of moral motives and behaviors, ontogeny and developmental pathways and contexts that children, adolescents and adults experience with respect to morality. It offers a comprehensive and timely tour of the field of moral development. **Home Environment and Early Cognitive Development**

Allen W. Gottfried,2013-10-22 **Home Environment and Early Cognitive Development** Longitudinal Research presents the results of longitudinal studies in Canada and the United States that looked into the relationship between home environment and early cognitive development. The aim of these investigations is to determine the specific or process home environmental variables that correlate with and possibly regulate cognitive development during infancy and the preschool years. Comprised of 10 chapters, this book begins with a brief introduction to the issues investigated. Each of the following seven chapters is devoted to a longitudinal investigation with emphasis on data presentation, analysis and interpretation. The influence of home environment on cognitive development in young children of middle socioeconomic status families as well as Mexican American children is considered. Assessments of cognitive development are carried out using standard psychometric tests of intelligence, Piagetian type measures of sensorimotor development, measures of language development and measures of recognition memory for infants. The final chapter assesses the implications for intervention of the link between home environment and early cognitive development. This monograph will be of interest to psychologists and sociologists.

Prosocial Development Laura M. Padilla-Walker, Gustavo Carlo,2015-12-15 Prosocial behavior, broadly defined as voluntary action intended to help or benefit another, has been associated with positive outcomes across the lifespan. Children with a more prosocial orientation are better liked and trusted by their peers, have a higher status in peer groups, are better at maintaining friendships, demonstrate better self-regulation, empathy and social cognitive skills, and excel in academics. Researchers have shown that prosocial behaviors correlate to lower rates of school suspension and drop out, teen pregnancy, substance use, aggression and delinquency. These positive effects speak to the value of prosocial behavior during formative years. **Prosocial Development** examines a variety of biological, socialization and contextual influences on prosocial

development from infancy through early adulthood While the definition of prosocial behavior may seem straightforward recent research has highlighted its multifaceted nature This volume specifically focuses on the multidimensionality of prosocial development examining different contexts motivations types and targets of prosocial behavior that are differentially predicted by socialization and dispositional characteristics Skillfully edited by Drs Padilla Walker and Carlo each chapter in this volume highlights some aspect of multidimensionality in regard to prosocial behavior and meaningful avenues for future research This volume will be an important tool for scholars researchers and practitioners who are interested in prosocial moral and positive youth development The organization and focus of this volume are also well suited for use as a text for graduate courses in moral development child and adolescent development social psychology sociology anthropology and family studies

The Caring Motivation Ofra Mayseless,2016 The Caring Motivation is a pioneering attempt to bring the diverse research on caring together and to examine caring as a motivation from a broad perspective that relies on these very diverse literatures Author Ofra Mayseless underscores that we as a species have an innate biologically driven and evolutionarily chosen yet contextually sensitive general motivation to care tend empower and nurture

Contexts for Young Child Flourishing Darcia Narvaez,Julia M. Braungart-Rieker,Laura E. Miller-Graff,Lee T. Gettler,Paul D. Hastings,2016-07-01 Human beings have the most immature newborn and longest maturational schedule of any animal Only 25% of the adult brain size is developed at full term birth and most of the brain s size and volume is co constructed by caregivers in the first years of life As a result early life experience has long term effects on physiological and psychological wellbeing Contexts for Young Child Flourishing uses an evolutionary systems framing to address the conditions and contexts for child development and thriving Contributors focus on flourishing optimizing individual physiological psychological emotional and communal social community functioning Converging events make this a key time to reconsider the needs of children and their optimal development in light of increasing understanding of human evolution the early dynamism of development and how these influence developmental trajectories There is a great deal of misunderstanding both among researchers and the general public about what human beings need for optimal development As a result human nature unnecessarily can be misshaped by policies practices and beliefs that don t take into account evolved needs Empirical studies today are better able to document and map the long term effects of early deficits or early assets mostly in animal models but also through longitudinal studies An interdisciplinary set of scholars considers child flourishing in regards to issues of development childhood experience and wellbeing Scholars from neuroscience anthropology and clinical and developmental studies examine the buffering effects of optimal caregiving practices and shed light on the need for new databases new policies and altered childcare practices

Handbook of Parenting Marc H. Bornstein,2005-02-16 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are

emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of characters responsible for parenting and is revealing of the psychological make ups and social interests of those individuals Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking and theory as well as classic and modern research on that topic All chapters follow a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In addition to considering their own convictions and research the chapter contributors present and broadly interpret all major points of view and central lines of inquiry

Human Development, an Interactional Perspective David Magnusson, Vernon L. Allen, 1983 **The Emergence of Morality in Young Children** Jerome Kagan, Sharon Lamb, 1987 How and when do children distinguish right from wrong Several prominent psychologists and a moral philosopher join in these essays to confront this issue and related questions and to clarify the controversies surrounding them Introducing cross cultural and cross disciplinary viewpoints the resulting volume is a landmark in the study of moral development **Applications of Cognitive-developmental Theory** Barry Gholson, Ted L. Rosenthal, 1984
