The Nazi Voter The Social Foundations Of Fascism In Germany 1919 1933:

The Nazi voter Tony Childres, **The Nazi Voter** Thomas Childers, 1983 The first study based on a large national sample of both urban and rural districts examines the Nazi constituency how it was formed from which social groups under what conditions and with what promises Using advanced statistical techniques to analyze Hitler's Voice: Organisation & development of the Nazi Party Detlef Mühlberger, 2004 Detlef Mühlberger's work Hitler's Voice The Volkischer Beobachter 1920 1933 is an important addition to the study of National Socialism In today's scholarship it is difficult to locate a detailed work on National Socialism that does not rely in some way on the Volkischer Beobachter it was truly the bullhorn of the party from the time when the National Socialists were no more than a small group of unknowns gathering at the Munich Bürgerbräukeller until they gained power in 1933 Considering the vast amount of literature on National Socialism however it is surprising that until now there have only been shorter articles and two dissertations and not a single comprehensive analysis of the newspaper Mühlberger's translation of articles from the Volkischer Beobachter addresses this lacuna He has sifted through eleven years of the paper condensing them into two volumes His first volume gives a chronological account of the development and organization of the party until 1933 while the shorter second volume entitled Nazi Ideology and Propaganda examines topical issues such as attacks against the Weimar Republic racism and attempts by the party to garner support from workers farmers and the German Mittelstand **The Oxford Illustrated History of the Third Reich** Robert Gellately, 2018 A thought provoking assessment and documentation of one of the most terrible periods in history the rise and fall of the Nazi Party *The German Bourgeoisie (Routledge Revivals)* David Blackbourn, Richard J Evans, 2014-06-17 First published in 1991 this collection of original studies by British German and American historians examines the whole range of modern German bourgeoisie groups including professional mercantile industrial and financial bourgeoisie and the bourgeois family Drawing on original research the book focuses on the historical evidence as counterpoint to the well known literary accounts of the German bourgeoisie It also discusses bourgeois values as manifested in the cult of local roots and in the widespread practice of duelling Edited by two of the most respected scholars in the field this important reissue will be of value to any students of modern German and European history *The Politics of Education* Marjorie Lamberti, 2004-10-01 Although the early history of progressive education is often associated with John Dewey in America the author argues convincingly that the pedagogues in the elementary schools in the big cities of Imperial Germany were in the avant garde of this movement on the European Continent Far more than a history of ideas this study provides the first comprehensive analysis of the culture wars over the schools in Germany in the 1920s Going up to the Nazi seizure of power the author's narrative sheds new light on the courageous defense of the republican state by the progressive educators in the 1930s and the relationship between the traditionalists' opposition to school reform and the attraction of certain sections of the teaching profession to the Nazi movement *Official Secrets* Richard Breitman, 1999-09 The holocaust and the suppression of

information and its effect for decades *Fascist Italy and Nazi Germany* Richard Bessel, 1996-03-28 A collection of essays comparing key aspects of Nazi Germany and Fascist Italy **Germany and the Second World War**, 1990 This is the second in the comprehensive ten volume *Germany and the Second World War* The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the Militargeschichtliches Forschungsamt Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler's war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich **A Short History of the Weimar Republic** Colin Storer, 2024-04-04 It is impossible to understand the history of modern Europe without some knowledge of the Weimar Republic The brief fourteen year period of democracy between the Treaty of Versailles and the advent of the Third Reich was marked by unstable government economic crisis and hyperinflation and the rise of extremist political movements At the same time however a vibrant cultural scene flourished which continues to influence the international art world through the aesthetics of Expressionism and the Bauhaus movement In the fields of art literature theatre cinema music and architecture not to mention science Germany became a world leader during the 1920s while her perilous political and economic position ensured that no US or European statesman could afford to ignore her Incorporating original research and a synthesis of the existing historiography this revised edition will provide students and a general readership with a clear and concise introduction to the history of the first German Republic
